

Gelunion Sprint

Last Updated: July 3, 2026

Effective Date: July 3, 2026

Opening Statement

This full privacy disclosure outlines all rules governing data capture, handling, storage and transmission within Gelunion Sprint, a mobile sprint-style application distributed globally via Google Play for cross-border users. When you download, install, launch and regularly interact with this app, you fully acknowledge that you have thoroughly read, fully understood and voluntarily agree to every clause laid out in this document. This statement complies with Google Play Data Safety audit standards, the EU GDPR, CCPA, COPPA and all regional cross-border data protection legislation applicable to overseas operation territories. This application only collects anonymous non-personal runtime metrics and will never gather your unique identifying private information unless you submit clear, active opt-in consent.

1. Automatically Collected Anonymous Operational Data

To sustain consistent smooth sprint performance, eliminate cross-terminal compatibility glitches and continuously refine your interactive experience, Gelunion Sprint passively gathers background technical and usage data throughout all your active sessions. All raw captured records will undergo full aggregation plus irreversible anonymization processing, so isolated data fragments cannot be used to trace back to any single individual end user.

The complete categories of automatically captured information include:

1. Terminal hardware markers: Mobile device model, installed operating system release version, exclusive device identification ID
2. Network transmission metadata: Public IP address generated upon device internet connection
3. User custom preference archives: Manually selected app display language and regional usage habits
4. Session tracking logs: App opening timestamps, continuous online length and full runtime activity trails
5. In-sprint behavioral analytics: Functional access frequency, touch operation trails and individual stage progression records

2. Authorized Scopes for Data Utilization

All information gathered by Gelunion Sprint is strictly confined to daily operational maintenance, technical fault elimination and long-term version iteration upgrades, and will not be diverted to irrelevant commercial ventures. All legitimate authorized usage scenarios are listed below:

- Maintain steady frame performance across all mobile hardware and OS variants, reduce runtime crashes, frame lag and abnormal loading failures
- Detect hidden technical defects and execute regular maintenance cycles paired with performance enhancement iterations
- Analyze user operating patterns to adjust sprint map layout, challenge difficulty and touch feedback logic
- Collaborate with certified third-party service vendors to deliver targeted advertisements and track marketing conversion metrics
- Complete legal compliance filings and platform inspection obligations required for worldwide market rollout

3. Third-Party Service Partner Overview

To construct a comprehensive auxiliary service ecosystem and elevate your overall user experience, we maintain formal long-term cooperation ties with internationally recognized third-party operators. Our collaborative spectrum spans ad delivery networks, mobile attribution tools, user analytics platforms and cloud hosting suppliers. These partners process limited non-sensitive data under our delegated authority to evaluate ad delivery efficiency and push promotional content aligned with your usage tendencies. Each third party operates under standalone privacy governance frameworks; you may review their detailed data handling provisions via the attached official hyperlinks:

- Unity Ads: <https://unity.com/legal/privacy-policy>
- IronSource: <https://www.is.com/privacy-policy/>
- Liff (Vungle): <https://liff.io/privacy-policy/>

- InMobi: <https://www.inmobi.com/website-privacy-policy>

4. Information Confidentiality & Sharing Restrictions

We strictly uphold user data confidentiality responsibilities and fully prohibit commercial sale or rental of collected data for profit motives. Limited data sharing is only authorized under legally mandatory preconditions:

- You issue explicit written voluntary consent for designated information disclosure
- Supply minimal essential datasets to cooperative vendors to guarantee uninterrupted service delivery
- Respond to statutory provisions, judicial rulings and official regulatory inspection demands
- Block illegal network intrusion and fraudulent acts to safeguard legitimate rights of Gelunion Sprint and all users
- Provide fully desensitized aggregated statistical data for internal product research and market trend assessment

5. Data Retention Standards & Multi-Tier Security Defenses

All user operational records are stored on overseas cloud servers with global information security certification credentials. We adhere to the minimal retention principle: data will only be preserved for the exact timeframe required to fulfill its original collection purpose. Once you uninstall Gelunion Sprint or the data loses practical operational value, permanent deletion or full irreversible anonymization will be executed instantly.

We deploy end-to-end transmission encryption, hierarchical access permission control and periodic vulnerability scanning to defend against data leakage and unauthorized tampering hazards. Please note no electronic storage or transmission technology can deliver 100% absolute security guarantees.

6. User Statutory Data Rights

Subject to the privacy legislation effective within your residential jurisdiction, you hold full legal rights to submit formal requests to view stored usage data, restrict partial data collection workflows or apply for complete data deletion. You may disable personalized targeted advertising by adjusting permission controls within your mobile device's system menu.

7. Minor User Safeguard Provision

Gelunion Sprint is developed and distributed exclusively for users aged 13 and older. We will not proactively gather any personal information belonging to minors under

thirteen years of age. If we accidentally obtain minor-related records without valid guardian approval, all such data will be fully erased immediately upon discovery.

8. Policy Revision Protocol

We reserve full authority to revise clauses within this disclosure statement to adapt to updated international privacy laws and app functional iterations. Your continued use of Gelunion Sprint after the revised policy's effective date constitutes automatic acceptance of all updated terms.

9. Privacy Inquiry Contact Channel

For all privacy-related inquiries, feedback or formal data right submission applications, please send correspondence via the dedicated support mailbox:
