3. Coal and Glaciers
4. Environmental Impact
5. Visual Narratives
6. Global Crisis
7. Educational Exhibition
8. Creative Solutions
9. Ecological Awareness
10. Cultural Reflection

Ideas for Integration with an API

Considering the visual and educational nature of the "Coal + Ice" exhibition, we can use the **OpenWeatherMap API**. This API provides current weather data, forecasts, and historical weather information for any location on Earth. Based on this, we could consider the following ideas:

Dynamic Weather Exhibition: Use API data to display real-time weather conditions of different regions, integrating these data with the images and videos of the exhibition. For example, as the website displays images of a region affected by climate change, it can also show the current weather or climate data of that area.
