Field Study 1

Gopez, Louffrey Angelo Legaspi.

BBTLED ICT 4-1

EPISODE 7: EFFECTIVE QUESTIONING AND REACTING TECHNIQUES

My Learning Activities

The students will observe 3 classes by using Observation Sheets for greater focus then analyze their observations with the help of guiding questions. write down their reflections on my observation and experiences.

Types of Questions

Factual/Convergent/Closed/Low Level - Who, what, where, when questions with one acceptable answer

Divergent/Higher – Order/ Open – Ended /Conceptual - Open-ended; has more than one acceptable answer

Evaluation

Comparison

Application

Problem – solving

Effective

Questions that the Resource Teacher Asked

- What comes in your mind when you hear networking?
- What is the basic principle in troubleshooting?
- How can you solve the problem if the network does not work? Is there a step-by-step process?
- What will be your ideas if HTML does not need notepad +?

My Analysis

Questioning is often used to diagnose the cause of failed products in the production systems. This method is employed to repair rejected products and to find root causes of problems so that failed products can be usable again. Learning from how it fixed it and how to resolve this kind of situation. Analyzing the main theme of subject and how the student will understand and apply it someday.

My Reflection

As a future teacher, I will do the right procedures and step by step on how to fixed and resolve the problem in troubleshooting and networking. It may reflect on our own life, especially when we are having a trouble in our home regarding pc problems and bugs. Furthermore, the importance of testing and troubleshooting of a product will be a part of this studies.

My Learning Portfolio

As a future teacher, asking questions for the students makes me more comfortably, because for me I will know all the lesson or topic that they want to learn more basically. Teacher

can learn from students while student can understand what will the teacher will discuss and how it can apply in the near future. In additional, teaching process can be more aspiring for the students who wants to be a future teacher one day.
