

Jalwere-Ashmoren's Anchor

(from "Demons; Denizens of Verekna" by Role Aids. XP and GP values by DM Superelf.)

This is an anchor that does 15-42 (3d10+12) points of damage and forces the victim to save vs. spell or be earth-bound, having the same effects as a *slow* spell.

A single swing of this anchor can cause such a mighty shock that the earth will tremble with a force so intense that earthquakes are felt for miles in any direction. No foundation can stand against the anchor's unbearable weight.
