## EXPERIENCE

### **Nomad Bank, Lagos (Remote) - Software Engineer**

July 2022

Building a digital bank for businesses.

Tech stack: MongoDb, AWS, Digital Ocean, Nodejs,

Role: Created and Architected backend Infrastructure for a modern banking startup software

Key contributions:

- Interfaced and integrated with legacy, established banking partners
- Created and maintained system for onboarding and verifying users
- Created error logging system that allowed for immediate bug tracking and follow up with the user experiencing the incident

Self Improvements:

- I took Classes on Scaling Nodejs on udemy,
- I also took aws serverless functions courses on youtube and udemy

<https://www.nomadbank.online/>

### **Selar, Lagos (Remote) - Full Stack Engineer (Laravel, Vuejs)**

December 2022

Tech stack: Laravel, Vuejs, MySql

Role: Working with existing monolithic code base, to improve performance and adding new features and integration

## SKILLS

Serverless Framework and AWS Lambda

Flutter (android and IOS mobile development tool kit)

Progressive Web Apps

Javascript

PHP - LARAVEL

Cloud administration (digital ocean and heroku)

Web Frontend (UI)

Reactjs (with Redux)

AngularIO

Vuejs

GraphQL

Dart

Nodejs (Expressjs)

Visual Basic Application (Excel)

## AWARDS

2nd runner up hultz price nigeria 2016

Winner CHESS tournament living faith youth camp 2014

## LANGUAGES

#### Key contributions:

- Contributed to improving code execution time, I improved a logic in php from  $N^2$  time complexity to  $2N$  which solved a major bug on a Laravel cron job.
- Took on sole projects (features) that brought in new subscribers and reduced churn rate.

English, Yoruba

Self Improvements: I took laravel deep dive courses on udemy, as i aimed to always write quality, scalable, DRY code

### **Hadiel, Lagos (Remote) - Software Engineer, MERN Stack**

Nov 2021

At Hadiel I was charged with building a multi-tenant system that empowered individuals across Africa to be able to make little monthly contributions (most times cheaper than netflix) towards battling health crises.

The system also provided an effective and transparent record keeping process between the health care providers, the individual subscribers and the platform administrator.

The platform is built on the MERN stack and we used a told party platform provider for sms delivery and ussd. The platform is deployed on GCP Cloud Compute.

Health is wealth, and I believe people should not have to break the bank to deal with minor or major health crises.

#### Key contributions:

- Health Wallet Creation and integration with licensed payment provider
- Secured authentication and access to health benefits using one time password
- Deployment to Google cloud

### **Saana Corp, Lagos (Remote) - Mobile Developer (Flutter)**

May 2021

I worked extensively on our mobile application built with flutter.

<https://saanapay.com/index.html>

### **EzeWholesale, USA (Remote) - Full-Stack Developer**

July 2020

I worked extensively on our backend and frontend of our electronics flipping platform. I worked to scale with mongodb, nodejs (expressjs) and reactjs (nextjs).

<https://ezewholesale.com>

### EarlyParrot, Malta (Remote) – Mean Stack Developer at EarlyParrot

June 2019 - November 2020

I work on building new and improving existing features using express js and angularjs, scaling our mongo db architecture and improving ui. Integrating 3rd party apps from woocommerce to shopify thus helping our clients grow through referrals on many platforms using a brandable, easy to integrate referral marketing solution for SaaS, E-Commerce & Email list building.

<https://earlyparrot.com>

### R & Co Developers, UK (Remote) – Shopify and 3rd party integrations developer

November 2019 – February 2020

We worked on a wide range of shopify stores constantly adding features for subscriptions and satisfying a wide range of customer and clients demands.

We integrated many 3rd party services for social media ads/engagement and analytics. We worked a lot using zapier, bold and many 3rd party services to help our customers sell more and better understand their market.

I was saddled with my documentation responsibilities as we had to do a lot of research into e commerce and ecommerce enabling platforms

<https://rcodevelopers.com/>

### Venten Ltd, Lekki, Lagos Nigeria (Remote) – Full-Stack Developer

Jan 2019 - June 2019

Worked on core backend and frontend using nodejs, mysql and regex to process transactions, and visualizations using reactjs.

<https://ven10.co/>

<https://kliqr.com>

### Riby Finance, Yaba Lagos, Nigeria – Software Developer

Aug 2017 - Feb 2019

Tied a set of APIs to our frontend Angular based applications. Implemented various data restructuring and operations for our analytics dashboards and user management needs, freeing up large processes from our backend services.

<http://riby.me/>

### Natterbase Technologies, lagos, Nigeria – Frontend Developer

Aug 2016 - Aug 2017

Built useable and desirable web interfaces from scratch with html css and bootstraps

<https://natterbase.com>

## ACTIVITIES AND SOCIETIES:

Co-founder of Flutter Lagos community

## Education:

Federal University of Technology Akure.

B.Tech - Industrial Chemistry

2016 - 2021

## Projects:

Riby Enumerator - Smarter, mobile-based data collection with Riby  
Trade Enumerator

Wauley Negpro – *National egg production scheme*
