

Environmental Committee 2025-6

Members: Bob Cooper, Mike Hornett, Joe Howard, David Reed, Allan Bell (Chair)

Business Project

We will follow up with face to face meetings, the 4 respondents to the trial leaflets delivered earlier in the year. Hopefully we will be able to establish projects with them and using the feedback consider improvements to the scheme. We will need to design appropriate recognition items such as stickers and trophies.

RiverCare and more

We will follow up contacts and organise a programme to clean-up/improve conditions in the river and water meadows in Towcester.

Consideration will be given to promoting environmental projects and competitions suitable for potential Young Environmentalists.

Plants for Schools and local interest

We will continue to provide plants for interested schools. It should be possible to widen this initiative through our school contacts and take opportunities to present talks.

There maybe other opportunities to provide plants for local locations.

Litter Picking

The Clubs long standing involvement to litter picking around Towcester will continue. Greater direct Club support would be welcomed.

Crocus's for Stop Polio

Crocus's will be purchased to support awareness of the Rotary Stop Polio project. This will focus on "Polio Plus " day for maximum publicity.

Working with local authorities and Rotary District

Efforts will be renewed to work with local authorities and other Rotary Clubs.

Environmental Awareness

Monthly reports to the Club on current environmental issues and items from the District Environmental meetings will continue. Consideration will be given to opportunities to help raise awareness in the community.
