മുല്ലപ്പെരിയാറിലേയ്ക്കൊരു യാത്ര - 15

Sketch of the Dam. Baby dam is built later without official sanction.

Top of the sand dam between baby dam and main dam.

Top of the Baby dam. This is the most weak part in Mullaperiyar Dam.

Back side of Baby Dam.

Elephants at Baby Dam.

Thursday, December 27, 2007

Way to the gallery.

Gate Locked for kerala.

Inside view of gallery. There is not enough oxygen to breath inside this gallery.

These cracks are due to the ageing of the Dam.

Sewage water is going through this small path.

-യാത്ര തുടരുന്നു...

Sunday, February 24, 2008

Mullaperiyar dam at 115 Feet. What about the cracks.

Cracks to the main wall.

Cracks on the main wall. and the water is entering into the dam.

Cracks Cracks on the wall...

The plaster is gone. Only stones leave. A dam on Bare Stones.

Cracks between the stones.

No Plasters in between the stones.

Vandiperiyar Town.

Idukki Dam on a rainy season.

If Idukki dam break the water will raise on the fifth floor of High court building Ernakulam.

High court building at Ernakulam
