

How To Instantly Get More Reviews And Customers By Having A Website

Majority of local businesses are missing out on huge amounts of income and new clients. By making a simple, but big mistake. That's why I want to share this secret with you, so you can faster achieve your business goals.

Well, How does a website help ME?

For most businesses, having no website is like making a cake with no flour, in the end it becomes a gooey mess with mediocre results. So I listed 3 things that websites do, which drive you results.

- 1) 70% of people judge a business by their website. If you simply don't have a website, most people will skip over you and go to your competitor who has a website.
- 2) Websites are one of the best ways to sell a product/service or to convince potential clients that YOU are the PERFECT person to buy from.
- 3) Websites will INCREASE your Google reviews. Customers are more likely to add a 5-star review, if they have a first good impression from your website. The more 5-star reviews you get, the more likely you will get more customers.

Why Do I Need A Website?

Depending on which business type you own, having a website might be crucial to getting more clients. And you might not even know it...

If you own a construction company, having no website will make it much harder for potential clients to see if you can actually build a house. Think of it: With a website you can easily showcase your work/portfolio.

How Can I Advertise My Website To Get More Clients?

If you are running any ads, or social medias, a website will work perfectly to show potential customers what you offer and if your offer/service fits them. You can simply add your website link to your bio or advertise it in a video.

A site is crucial, if you want to run an Online Store. Because that's the ONLY possible way you can sell ANYTHING. Dropshippers combine their Tiktok/Instagram with their website to sell their product, and for those who put effort in their website, go on to become millionaires.

The same can work with cafes, restaurants and more.

Difficulty with reaching clients

At the height of Covid-19, a lot of businesses were struggling to offer their services/products to consumers. So they had to rely on a website to do that for them, and it worked amazingly well.

A good business website lets customers easily engage and explore what your brand offers, regardless of its location.
