EX03 - Sitemap/navigation/content model

Place: Fairfax California

My goal is to create a travel site about my hometown, Fairfax, CA. For this site, I want to focus on the most drawing attractions and activities for people visiting. I will include a page for popular outdoor and active activities such as popular biking and hiking trails, many famous trails, and roads cut through town. I will also include a page with local restaurants and local stores and shops. I may want to include a section about popular things to do and see in areas nearby as well if I need more information (Such as going to the beaches by the coast, going into the city, or seeing the Golden Gate).
