"Abortion provider" or "Provider of abortion care"	"Abortinist"												
"Pregnant person" or "People who have abortions"	"Woman" and other gender exclusive language												
Download link  There are two different forms of abortion care. Both are safe and effective, and both face harmful bans and restrictions. MEDICATION ABORTION is available up to 11 weeks of pregnancy and is provided using two different medications called mifepristone and misoprostol. PROCEDURAL ABORTION is sometimes called an aspiration abortion or surgical abortion.	- Both medication and procedural abortions are safe and effective, and both face harmful bans and restrictions. - What's the difference between a medication abortion and a procedural abortion? Learn more: prh.org/reporterresource/

- All kinds of people need and get abortions! No one should face unnecessary barriers to abortion because of who they are, where they live, or any other reason.
- If someone is young, or Black, or LGBTQ, they may face unique barriers to accessing abortion. We need to remove these obstacles to ensure abortion access for everyone.
