

## **Backup and Restoring Courses**

Many are preparing for this summer's courses and we wanted to remind you of the process of backing up a course and copying it for the summer semester. Some may choose to simply "Import" from another course, however, this Tuesday Tip is focused on Backup and Restore.

There is not much difference between "Backup and Restore" and "Import" except this process creates a downloadable copy of a course (without student data) and "Restrictions" are also restored (such as restrictions based on the Enrollment Verification Activity).

By the way, the summer EVA and Orientation are the same for the Summer as they were for Fall 2020 and Spring 2021. We will have a new EVA and Orientation for the Fall 2021 semester.
