

The Future

What technological advancements do you think will have the biggest impact on our daily lives in the next 20 years?

How do you envision the future of work? What jobs do you think will become obsolete, and what new careers might emerge?

What changes do you anticipate in how we address climate change and environmental sustainability in the future?

How do you think advancements in artificial intelligence will shape society and human interactions?

What are your thoughts on the future of education? How might learning and teaching methods evolve?

What role do you think space exploration and colonisation will play in humanity's future?

How do you foresee the future of healthcare and medicine? What breakthroughs might we see in the next few decades?

What societal changes do you predict as a result of increasing global connectivity and communication?

How do you imagine the future of cities and urban living? What innovations might change the way we design and experience urban spaces?

What are your hopes and fears for the future of human relationships and communities in an increasingly digital world?
