#### **Authors' contribution**

**Revista Guillermo de Ockham** adopts the <u>CRediT taxonomy</u> to describe the individual contributions of each author to the work. The corresponding author is responsible for providing the contributions of all authors. We expect every author to have reviewed, discussed, and accepted their individual contributions. Contributions will be published with the final paper and should accurately reflect the contributions to the paper. Please consider the following: Author contributions should be completed if the paper is signed by more than one author; check the box corresponding to each author's contribution and according to the nature of the study (if one author participated in all stages, check all boxes).

#### **Ethical Statement on Research**

Please state, by marking with an X, whether the research complied with the research ethics principles and other ethical principles of scientific publication. Check "Yes" if it met or agreed with the criteria; otherwise, check "No", or check "NA" if it does not apply.
