Workshop Series

Date: 12/14/2022

Context and Driver for this Proposal:

Non-Verbal Communication, Hypnosis, Neuro Linguistic Programming, Traditional Chinese Medicine, Aikido..

In the specific I'd like to start with a Non-Verbal Communication topic.

This topic is a deep understanding on how we emotionally work. The workshop will reveal what goes unseen in the communication's interaction. Once we understand and we use this knowledge we will be able to change ours and others emotions, therefore we can obtain a better outcome and create a positive rapport.

Non-Verbal Communication is part of the Soft Skills and leads to manage conflicts and obtain assent and consent whether with friends, relative, offspring and also ourself.

I would like to present and teach this in the DL community.

Since it is a vast topic I will start with body-language and the emotional tensional's discharges.

I am using these techniques on a regular basis during the treatment that I perform to clients.

Every workshop will give a technique ready to use from everyone.

Each workshop will range from 2 to 3 hrs.

Expected Outcomes:

1. Manage conflicts
2. Understanding how we emotionally work
3. Reveal what goes unseen during communication interactions
