

Pika Release Notes 2017.10.0

Released Nov 15, 2017

New Functionality

- Performance Improvements
 - Account Validation cached (main and linked accounts)
 - Catalog records with Archive links (aka samePika) now cached
 - Clear cached links in Staff View section of Grouped Work or Islandora Object View

- Grouped Work View
 - Improved caching of description
 - Fixed caching of record from Solr
 - Caching of user-lists used for Browse Categories
 - Account Menu
 - Checkout, hold, etc counts loaded via AJAX
 - List of user-lists cached
 - Internal use of userdata refactored to take advantage of caching
- OverDrive Improvements
 - Large numbers of OverDrive changes will no longer block indexing while the changes are extracted.
 - Advantage copies that have been moved to the shared account are now correctly reflected within copy display

The screenshot shows a table titled '▼ Copy Details'. The table has two columns: 'Library' and 'Owned Available'. The first row of data shows 'Shared Digital Collection 1' under the 'Library' column and '0' under the 'Owned Available' column.

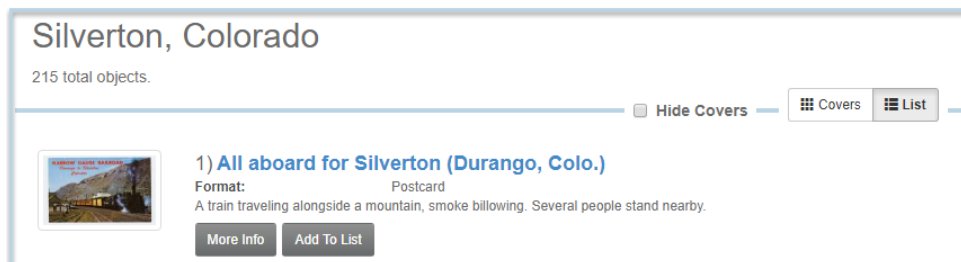

Library	Owned Available
Shared Digital Collection 1	0

- Weeded titles will no longer appear within Pika

- Archive homepages can display a map for multiple collections (aka meta-map)

- Archive map view can now display without a Timeline filter

- Sideload cover images for Classroom Video on Demand, Films on Demand, BiblioBoard and Kanopy
- Sideload cover images for ebrary sideloads that are now called ProQuest
- Lexile branding updates
- Updated and standardized Marmot ftp server setup of Marc data for sideloads
- Automatic restart of Islandora web server (Tomcat) when it halts

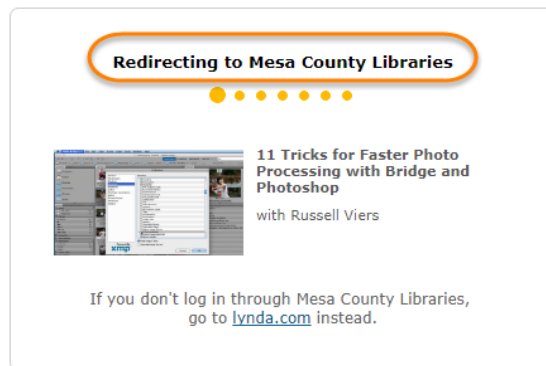

Bug Fixes

- Pika will not be unresponsive during Islandora system upgrades
- Availability facet was not indexing for some scopes using sublocation
- Archive Object View will not display a subtitle when it is the same as the title
- Person entity will display birth or death date even when there is not other genealogy data

- Can now add Other Region to addresses for person entities in Archive
- When sideloads have IDs of the same format as a Grouped Work, the sideload record link will not redirect to the grouped work.
- Arlington Pika needlessly listed pickup locations multiple times in Place Hold prompt
- Removed old Library Admin options with no function
 - Record View - Main Details option: Locations
 - Record View - Notes Tab Name

Sideloads

- [EBSCO eBook](#) Collection for Adams State
- [Axis360](#) for Englewood
- Consolidated Lynda.com Sideload for Marmot
 - Existing sideloads converted for EVLD, Grand County, Pitkin County, Vail, Wilkinson
 - New libraries added: Basalt, CMC, and Mesa County

- Lynda.com for Boulder
- Kanopy sideload for [Steamboat Springs](#) and [Anne Arundel](#)
- Nashville sideloaded [Classroom Video on Demand](#)
- Biblioboard sideload for CCU (go live on deployment)
- [Gale 18th Century](#) sideload for CCU
- Added proxy links to CCU's Alexander Street sideload
- Renamed Adams State ebrary sideload to ProQuest
- Removed Oneclickdigital sideload for Englewood
- Sideloading FTP folder restructuring
 - **Adds and Updates Only** - Partial file with added items since last update, or records that have been updated, or collection has several different Marc files
 - **Complete Collection** - Marc records sets are complete representation of the eContent
 - **Deletes Only** - When records have been removed from the collection, and you have been given those files as a set of Marc records
 - **Processed** - When the production Pika server has actually processed the files
[eContent Collections successfully sideloaded](#)

Additional Work

- Fort Lewis Archive Homepage redesign
- Google Analytics for Pitkin and Grand County
- Updated Vail logo
