

[Moose in the Valley?](#) May 10, 2025 Colorado

The Alamosa News

... from 1991-93, CPW transplanted 93 moose from Wyoming, Utah and North Park, Colorado to the Upper Rio Grande River Valley in Mineral and Hinsdale Counties, near Creede. That program continued the effort of transplanting Shiras Moose to Colorado that was started in 1978 in northern Colorado... today, Colorado is home to more than 3,000 moose...

[Moose have lived in Colorado for centuries – unpacking the evidence from history, archaeology and oral traditions](#) August 11, 2025 The Conversation

... Diaries, newspapers and photo records from the past two centuries show the presence of not only young bulls, which at times can range widely, but also cows and calves, a sign that local breeding was taking place in Colorado before reintroduction... Today, informal estimates by Colorado Parks and Wildlife put [the moose population at around 3,500 animals](#)..,
