

Worksheet on Regrouping of 2 digit numbers –

By regrouping add the two numbers given below -

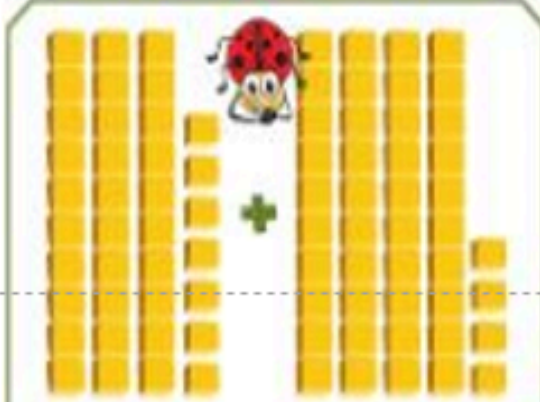

A base ten block diagram showing the addition of 26 and 25. The first number, 26, is represented by two tens rods and six ones units. The second number, 25, is represented by two tens rods and five ones units. A plus sign is placed between the two groups. A small green frog is standing next to the first group of blocks.

**26 + 25 = ?**

**50      51      53**

A base ten block diagram showing the addition of 37 and 44. The first number, 37, is represented by three tens rods and seven ones units. The second number, 44, is represented by four tens rods and four ones units. A plus sign is placed between the two groups. A small red ladybug is standing on the first group of blocks.

**37 + 44 = ?**

**81      82      84**
