Abstract: A concise and factual abstract is required (maximum length 200 words). The abstract should state briefly the purpose of the research, the principal results, and major conclusions. An abstract is often presented separate from the article, so it must be able to stand alone. References should, therefore, be avoided, but if essential, they must be cited in full, without reference to the reference list. Non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself.

Keywords: Immediately after the abstract, provide three to five keywords. Each keyword separate by semicolon (;). Avoiding general and plural terms and multiple concepts (avoid, for example, 'and', 'of'). Be sparing with abbreviations: only abbreviations firmly established in the field may be eligible. These keywords will be used for indexing purposes.

Introduction

Book Antiqua 11pt Bold, Space 1, Justify

State the objectives of the work and provide an adequate background, avoiding a detailed literature survey or a summary of the results.

Book Antiqua 10pt, Space 1, Justify

Materials and Methods

Book Antiqua 11pt Bold, Space 1, Justify

This section of the report gives a detailed account of the procedure that was followed in completing the experiment(s) discussed in the report. Research design and method should be clearly defined.

Sub method (optional)

Book Antiqua 10pt Bold, Space 1, Justify

Sub methods are allowed if needed. If you use equations, the equations must use *the equation feature* in

Microsoft Word, not an image. The equation should be numbered as follows:

$$r_{11} = \left(\frac{n}{n-1} \right) \left(\frac{s^2 - \Sigma pq}{s^2} \right) \dots\dots\dots (1)$$

Result and Discussion

Book Antiqua 11pt Bold, Space 1, Justify

In the Results and Discussion section, you present your results and discuss them by: commenting on the results obtained, interpreting what the results mean and, explaining any results which are unexpected. You can display data in the form of tables, graphs, or figures.

Book Antiqua 10pt, Space 1, Justify

The tables must be written in *Book Antiqua 9pt and space 1*. The table format used in this journal article is as **Table 1**.

Table 1. Format of Table □ (*Book Antiqua 10pt, space 1, Center*)

Fraksi	Fase Gerak	Rf Spot-1
1	n-heksan : etil asetat (7 : 3)	0,62
2	n-heksan : etil asetat (6 : 4)	0,51
3	n-heksan : etil asetat (6 : 4)	0,40
4	n-heksan : etil asetat (6 : 4)	0,40

The graphic should be **centered** and like the format in **Figure 1**.

Figure 1. Attached figure in article (*Book Antiqua 10pt, space 1, Center*)

The figures should be **centered** and like the format in **Figure 2**.

You present the measurements made in the experiment and you then compare your measurements to the calculations you made in your preliminary work or the published theoretical values.

Conclusion

Book Antiqua 11pt Bold, Space 1, Justify

The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Results and Discussion section.

References

Book Antiqua 11 pt Bold, Space 1, Justify

Guideline for bibliography in **SJP** is as follows:

1. References must be the same as citations
2. Minimum 10 references for each article, 80% of them are primary references such as journal articles, conference proceedings, and thesis/dissertation.
3. The references must be last 10 years.
4. The authors are highly encouraged to use reference manager such as Mendeley, Zotero, EndNote, and others.
5. The references applies APA 7th Edition (*American Psychological Association*).
