

PREPARATION: Successful mastery of the pre-algebra course, 8th grade Enriched Math and less than masterful completion of EAA.

Enriched Algebra A is designed for the student who has already learned some of the major concepts and processes of algebra but seeks a deeper and broader understanding of the discipline. This course integrates the advanced elements of algebra with technology, problem solving, application and mathematical modeling. As well, Enriched Algebra A is designed to further develop the student's reasoning skills, with an emphasis on logic that is central to student achievement in upper level mathematics courses.
