1. Introduction

Provide the study background in simple words. Provide text references to all the facts presented in this section in IEEE citation style [1].

2. Literature Reviews

A review of literature can be written to meet the needs of your research. This section can also be combined with the introduction section. The author can discuss the research gap that this study is going to or is willing to fill in this section. Provide an IEEE citation style in-text citation.

3. Methodology

For the Quantitative Study: Include Population and sample [criteria of population selection and method of sampling] materials/tests with description, variables, Nature of data, data collection techniques, data analysis method. Discuss software, hardware's used during the study with their brand names. This section should be easy enough for any reader to repeat the study under similar conditions.

Provide logical and scientific analysis of the findings of the study. Present evidence to support your analysis by citing the work of earlier researchers or existing theories. [How your results agree to disagree with previous studies, and why]. Conclusion should be written in very clear words. It should explain how the objectives of the study are accomplished.

Acknowledgement

Author should present list of acknowledgement at the end. Any financial or nonfinancial support for the study should be acknowledged.

6. References

All references should be in IEEE citation style as link below and present inside the main body of article. Don't put extra references which are not cited.
