

Tahmid Khan

I'm a full stack web engineer, with a very strong affinity towards product design and CSS. I'm also competent at technical writing, and have been published a few times.

OPEN SOURCE DEVELOPMENT

Halfmoon – Project Lead

2020 – PRESENT

Halfmoon is a front-end framework with a built-in dark mode and full customizability using CSS variables. As of the current version, I have personally written all of the code, and also the documentation. V2 is in stealth mode right now.

EXPERIENCE

NFTY Labs – Core Developer

MAY 2021 – PRESENT

NFTY Labs is working to bring genuine utility to NFTs through a suite of awesome Web3 products.

Arektu – Founder & CEO

AUG 2017 – DEC 2019

Arektu was Shopify for Bangladesh. Despite some initial success, we failed to find product market fit – merchants still preferred Facebook stores over websites. I decided to cut our losses at the end of 2019, and shut down the company.

SKILLS

- Python and Django (6+ years)
- JavaScript (6+ years)
- Product Design
- HTML, CSS and UI/UX (6+ years)
- Technical Writing (Docs, Guides, etc.)
- Working with SQL databases, mainly PostgreSQL
- Web Accessibility

PUBLISHED WORKS

I have also been published a few times in a popular blog for design and front-end programming.

1. [Styling Comment Threads](#)
2. [Considerations for Making a CSS Framework](#)
3. [Halfmoon: A Bootstrap Alternative with Dark Mode Built In](#)

EDUCATION

North South University – B.Sc. in CSE

MAY 2014 – SEP 2019

Met some cool people and learned a few interesting things. Looking back, I enjoyed my time in university. I ended up graduating with a Cumulative GPA of 3.68.
