

## Top 5 Killer SEO Tips For Beginners

SEO is a very difficult to learn and never ending topic for blogger, the more you learn the better you get. In my past 6 months of blogging career believe me every day I learn new SEO tips from one or another blog sites. But what if you have just started, you cannot be very technical in the early stages. So you need to first begin with the ABC of it. And here I am going to teach it to you. Some basic SEO tips that every beginner should learn right away.

### Catchy Post Titles

This is a very easy to learn SEO tip, make sure whenever you write a new post make the title of the post very catchy and attractive. People would never like to see a post which has a very dull and boring title. Let's take this post as an Example - A Good Title "Top 5 Killer SEO Tips For Beginners" and the boring one "Some SEO Tips." Include some catchy headlining words in the post title. In this case "Top 5 Killer." Whenever you search for anything on Google you get thousands of results, but do you really visit all of them. No, you only visit the one which you think would give the perfect information and

would seem to you very catchy.

## Use Social Media

The main secret for SEO for beginners lies in Social Media. It's not a very complex task and anyone can do this. Use social media, each and every one on which you can get your hands on. Use Facebook, Twitter and especially Google+. With the increase in the population on Social Sites than on the streets, target the audience with your brand name where you find more people. It can bring huge traffic to your site and consequently increase your rankings on Search Engines.

## Linking Pages

The biggest example you can see yourself is if you read Wikipedia. Have you seen how they interlink each and every post on their site within the related posts? That's why their site has such a less bounce rate, i.e. no. of visitors that include just one page view. So, connect your posts within one another and see the results yourself. This tip will keep your audience for more time on your site and will keep the flow on. Include a popular post widget below each and every post of your site or in the sidebar so that people can see it clearly. This will help a lot.

## Use SiteMaps

Using sitemap can help a lot as it just gives the search engines a map so that they can easily navigate and index each and every page of your site. There are many popular plugins available for WordPress Platform which can help you do this task easily. One of my favorite and the one which I am using right now is SiteMap XML. So go ahead and create a sitemap for site and submit it to Google through the Webmasters Tools Page.

## Write Guest Posts

This can help you both in getting traffic to your site as well as building some backlinks. The main reason of doing so is since you have just started out; therefore the chances are you might not get a lot of views. So if you write Guest Posts for some big sites you will surely get a backlink through that post and the second is that people might visit your own site from the guest post if they like it. I write occasionally for many blogs and believe me just a single post over there brings considerable amount of traffic to my site.

## Company Description

The Best WordPress Plugins for Search Engine Optimization for Your Website. You want to get your website found by potential customers, clients or patients. Or maybe you are an agency looking for the best intel on the newest options for improving your clients' SEO. Our comprehensive, unsurpassed-in-detail plugin reviews and comparisons will ensure you make the right choice when selecting a WP SEO Plugin for your website.
