

Yansel & Jay - Script For 2nd Vid - Ni Sa Re

Sound Effects With Knives

How I used Knives to create this!!!!!!
[play glimpse of final product]

First, record some knife swishes

[Screen-recording] **Now** add a Bitcrusher, EQ, Flanger, Scanner Vibrato, Enveloper and a pitch correction plugin.

[More screen-recording] Next, send a bus to your knives track with Reverb, Delay, EQ, and any automated panning plugin.

[Only talking head] **Don't Forget!!!** This is all trial-and-error so **play with** different settings and the order of the plugins to get **what you like!**

Before adding the knife swish: [show before]

And after: [show after]

This is how it sounds like in the full mix.
