**Subject line:** After 10 loyal years of hard work, just to get KICKED

Just because I messed up a project

Now I can't pay the bills for my family

Is this what I've worked my ass off for my whole entire life

Just to be treated like a slave

Having complete control over my time, and my income just for me to live from paycheck to paycheck

I got tired of this endless cycle

There is no place for me to work in this city other than my last job.

It started to get really serious

My wife said that she would leave me with the kids if I didn't make it

Even the kids are worried if their Daddy could pay the bills

I started to offer my service EVERYWHERE

But no one accepted me

Everything was going downhill for me

But it was not until I read this amazing book

Now I am in a big mansion with all the supercars I've ever wished

No job, No boss, and no problems

Completely free from the enslavement

I can wake up, work, eat, and sleep whenever want and whatever I want wherever I want.

Every desire I have ever wished for is fulfilled

My life had completely changed for the best

All thanks to this book that I read
