

CS-389 Notes 2020-02-24

Stand-up Meeting

- Daniel looked into knowledge bases
 - Consumer interaction, interaction between teams
 - Not advantageous over Google Drive
 - Better file management w/in Drive
- Website
 - Internal and external links now available on homepage
 - Any new website features you want, add them to the checklist on the “Website Admin” card in the Roles list, on the Class Contributions Trello board

Internal Data Structures

- Using a Linked List?
 - Multiple games running concurrently
 - Array with LL appended to each user
 - Generated “round robin” style to avoid cycles
 - Each user inputs a game code (stored locally) along with user/pw
 - GameID is a property of each user
 - Gets the following from online DB
 - Row of current user
 - Target’s userID/name

See Trello Project board and Whiteboard Drawings

//TODO:

- Fill out Features Backlog (card on Class Contributions)
