Johor State Debate Competition	AJK Aktiviti
School STEM Program	AJK Aktiviti

WHY YOU WANT TO JOIN PEKA UTM 2026/2027
I want to join PEKA UTM 2026/2027 to get more involved in the civil engineering community and gain practical experience outside our lectures. I'm eager to work alongside peers and seniors, help organize society activities, and build meaningful connections along the way. Beyond taking on new responsibilities, I see PEKA as a great platform to work on my communication and teamwork skills so I can grow into a well-rounded and competent engineer in the future.

YOUR 3 MAJOR STRENGTH	YOUR 3 MAJOR WEAKNESS
Attention to Detail and Accuracy	Tendency to Overthink Before Taking Action
Adaptability and Willingness to Learn	Over-Focus on Small Details
Strong Time Management and Consistency	Discomfort With Unclear Instructions

WHY DO YOU DESERVE TO BE A PART OF PEKA 2026/2027
I believe I deserve a spot in PEKA because I bring both strong technical dedication and hands-on reliability. As a civil engineering student, I take pride in being thorough and structured, whether that's tackling academic work or managing event logistics. I'm ready to pull my weight, communicate clearly, and take on the groundwork needed to make society events run smoothly. You can count on me to bring the energy, discipline, and consistency needed to support the team from initial planning all the way to execution.
