GET RID OF THE FILIBUSTER, AT LEAST ON THE FOR THE PEOPLE ACT.

Sen. Feinstein, the filibuster is a legislative loophole historically used to prevent civil rights legislation. While it may be nice in theory, it is silly to protect it now in hopes that Republicans will do the same in the future. As soon as the tables are turned, they will get rid of it. Immediately.

When they get rid of it, it will be to destroy our democratic institutions, as they've proven so eager to do lately. We need to get rid of the filibuster to protect those very institutions.

Right now, there are countless measures Republicans are taking on the state level to curb voting rights and gerrymander House and state legislative seats. This is happening right before our eyes, and they are proud of it.

The solution is passing the For the People Act, which gets rid of partisan gerrymandering. The only thing standing in our way is the filibuster. Please vote to get rid of the filibuster, at least for the For the People Act.

If we do not take that opportunity, we will be relegated to the minority for more than a decade. And, worse, our country will never be the same.

Thank you.

Sen. Padilla, as you know, Sen. Feinstein has expressed opposition to getting rid of the filibuster, in any legislative context. Please work to persuade her otherwise, at least in the context of the For the People Act.
