Last Chance (Closing Tonight)	[FINAL CALL] AES10: Be an AI Mastermind Leader (PLR) closes at Midnight PST	Last chance to claim all 53 animated AI Mastermind Leader videos + full PLR

Swipe 0: Pre-Launch Teaser

Hi Person,

Most online communities collapse under their own weight within ninety days.

They start with an excited rush of signups, a noisy social feed, and a host promising daily breakthroughs. Then the content treadmill speeds up. Unpaid moderation piles onto the calendar, monthly third-party software bills stack up, and serious business owners quietly cancel because scrolling through endless chat threads never solved their real operational bottlenecks.

Tomorrow morning at 9:00 AM EST, Charles Terrence Harper and Harper Academy are releasing **Animation Education Series Volume 10 (AES10): Be an AI Mastermind Leader**—a complete 53-video (Introduction + 52 weekly modules) hand-drawn animated curriculum with full Private Label Rights (PLR).

Here is a preview of what this blueprint teaches (and what you can rebrand and sell as your own flagship program):

- **The Reliable Leader's Philosophy & Single-Ecosystem Mandate:** Why accomplished business owners pay for an "airliner pre-flight checklist" filter rather than breathless Tuesday AI hype—and how to eliminate fragile software sprawl by anchoring your entire mastermind inside Google Workspace.

- **Private Google Workspace & Hub Architecture:** Combining Google Sites, Google Groups, Google Chat, Google Forms intake audits, and Google Calendar Appointment Schedules into a single password-protected command center with zero brittle webhooks.
- **Living Mastermind Wikis in Gemini Notebook:** Transforming every Google Meet call transcript, member case study, and SOP template into a source-cited living knowledge vault inside Gemini Notebook that appreciates in value every single week.
- **Full Private Label Rights Included:** Edit, rebrand, claim authorship, or deploy all 53 unwatermarked hand-drawn animated lessons as your own high-ticket coaching curriculum or digital product.

Watch for my email tomorrow morning at 9:00 AM EST when the launch doors open at the lowest early-bird price:

To your steady leadership,
Person

Swipe 1: Launch Day — The Core Transformation & PLR Opportunity

Hi Person,

Serious professionals and business owners do not want another noisy hangout or low-ticket chat forum. They want a structured advisory table led by a calm, reliable guide who helps them remove concrete business bottlenecks week after week.

Today, Harper Academy just went live with AES10: Be an AI Mastermind Leader—a comprehensive 53-video hand-drawn animated course (with full **Private Label Rights**) that shows educators, coaches, consultants, and digital marketers how to build, facilitate, and monetize a high-trust AI advisory mastermind entirely inside Google Workspace and Gemini Notebook.

Instead of stitching together five separate platforms and praying your payment webhooks don't misfire, this 7-phase curriculum walks step-by-step through a unified, enterprise-grade operating system:

- **Servant Leadership & The Testing Buffer (Modules 0001–0007):** How to screen out tire-kickers with a Mastermind Charter and Ideal Seat Profile, earn Google Professional and Educator credentials, and stress-test new Gemini features in your own business before teaching them to paying members.
- **The One-Bookmark Google Sites Command Center (Modules 0008–0014):** Wiring Google Groups (broadcast archive) + Google Chat (threaded spaces) + Google Sites + Google Forms intake audits so new members get diagnosed before their first call.
- **Time-Tiered Access & Multi-Stream Monetization (Modules 0015–0021):** Pricing tiers around direct access to your calendar time (Asynchronous Foundation, Bi-Weekly Group Advisory, and Executive 1-on-1), bridging free followers via Google Workspace and Coursera/Udemy affiliate referrals, and managing renewals in 5 minutes a week inside Google Sheets.
- **Unrestricted Private Label Rights (PLR) Asset Package:** You get all 53 hand-drawn animated training videos, scripts, slide decks, audio briefs, and sales materials ready to put your name on and sell for 100% of the profits.

See the full 53-video syllabus and claim early-bird launch pricing right here:

Best regards,
Person

Swipe 2: The Single-Ecosystem Mandate (Killing Software Sprawl)

Hi Person,

Have you ever looked at what most community hosts force their paying members to juggle just to find a meeting link, a worksheet, or a replay?

Five tools. Five separate logins. Cluttered chat feeds, expired video links, third-party scheduling widgets, and brittle automation webhooks that lock out paying clients while letting canceled members stay inside for months.

Inside AES10: Be an AI Mastermind Leader (now live with full Private Label Rights), lessons 0004 and 0008 through 0014 dismantle that fragile patchwork and replace it with a **Single-Ecosystem Mandate** built natively on **Google Workspace**:

- **Enterprise Privacy Protection:** Why hosting a mastermind on free consumer social feeds exposes member financials to ad profiling—and how a dedicated Google Workspace tenant protects proprietary member workflows and builds instant psychological safety.
- **Dual-Channel Communication Backbone:** Pairing Google Groups (for permanent, searchable executive briefings in the inbox) with tiered, locked Google Chat rooms (for daily collaboration and Monday Targets / Friday Wins).
- **Zero-Code Site Architecture with Gemini:** Feeding your Mastermind Charter, Ideal Seat Profile, and curriculum outline into Gemini to generate a clean 5-page Google Sites hierarchy—embedding Google Classroom, Drive vaults, Calendar schedules, and Meet links under one single bookmark.
- **Diagnostic Onboarding via Google Forms & Gemini Notebook:** Routing member intake audits into Google Sheets and Gemini Notebook so Gemini drafts personalized onboarding briefs and live call agendas before your cohort even meets.

Whether you want to launch your own advisory mastermind or resell this 53-video animated curriculum to coaches and consultants as your own product, you can grab the entire package here:

Talk soon,
Person

Swipe 3: Living Wikis in Gemini Notebook & Live Co-Building in Gemini Canvas

Hi Person,

Here is the silent killer of almost every coaching group and mastermind:

Your weekly video call disconnects... and 90 minutes of peer breakthroughs, prompt workflows, and strategic insights vanish into thin air. Next week, members solve the exact same problems in isolation, and before long they start asking, *"Is my membership actually worth it?"*

AES10: Be an AI Mastermind Leader shows how to turn every ephemeral call into an appreciating intellectual property vault using **Gemini Notebook, Gemini Canvas, and Gemini Spark Agents**:

- **Living Mastermind Wikis (Modules 0025, 0026 & 0038):** How to take automated Google Meet cloud transcripts, Google Docs templates, and Google Forms case studies and ingest them into structured notebooks inside Gemini Notebook—so members can query the vault and get grounded answers with direct citations back to verified peer breakthroughs.
- **Live Asset Co-Building in Gemini Canvas (Module 0032):** Stop ending calls with abstract lectures. Put a volunteer in the hot seat on Google Meet, open Gemini Canvas side-by-side, and co-build their SOP, client proposal, or prompt sequence live on screen.
- **Deploying Gemini Spark Agents First (Modules 0033–0035):** Why a real leader deploys Gemini Spark agents inside their own daily operations first (automating intake briefs, attendance flags, and agenda outlines), logs the messy engineering failures in Gemini Notebook, and turns real-world teardowns into member clinics.
- **Gamified Milestone Credentials (Modules 0028–0029):** Combining scenario-based Google Forms assessments with Certify'em and Google Slides to automatically issue serialized, verifiable PDF certificates when members hit an 80–90% mastery threshold.

Plus, because this release includes **Private Label Rights (PLR)**, you can teach these exact workflows to your clients or sell the entire 53-video animated course under your own brand:

Best,
Person

Swipe 4: Time-Tiered Revenue, Annual Charter Passes & The 5-Minute Renewal Ledger

Hi Person,

One of the fastest ways for a mastermind leader to burn out is offering unlimited access at one flat monthly rate.

The loudest members hijack every call and flood your DMs, the quiet high-performers feel neglected and cancel, and every 30 days you ride the monthly churn rollercoaster wondering who is going to drop out next.

Phase 3 of AES10: Be an AI Mastermind Leader (Modules 0015–0021) lays out a calm, multi-stream revenue architecture that protects your calendar and eliminates brittle billing software:

- **Tiering by Direct Leader Time (Module 0015):** How to structure three distinct tiers around your scarcest asset—your calendar: an Asynchronous Foundation tier (Classroom + Chat + Gemini Notebook Wiki), a Mid-Level Group Advisory tier (bi-weekly timed Google Meet hot seats), and a Premium Executive tier (1-on-1 audits booked via Google Calendar Appointment Schedules).
- **Annual Charter Passes vs. Monthly Retainers (Module 0019):** How to get off the 30-day churn treadmill by positioning 12-Month Charter Passes alongside disciplined monthly retainers for upfront cash flow and year-long member runway.
- **Monetizing the Non-Recurring & Free Audience (Modules 0016–0018 & 0052):** How to earn steady referral revenue helping free followers set up Google Workspace and Coursera/Udemy certifications—plus how to package summit and interview archives into high-ticket standalone courses in Google Classroom.
- **The 5-Minute Weekly Renewal Ledger (Modules 0020–0021):** Why manual admissions and offboarding take less than 10 minutes a week using a 7-column conditional-formatted Google Sheet and Gemini-drafted renewal reminders—saving you from awkward webhook lockouts.

Grab the complete 53-video animated blueprint (with full Private Label Rights) while launch pricing is still active:

Warm regards,
Person

Swipe 5: High-Trust Facilitation & The 4-Pillar Organic Authority Engine

Hi Person,

How do you consistently fill high-ticket mastermind seats with accomplished business owners—without running loud, hype-driven countdown funnels or dancing on social media algorithms that bury your posts in 24 hours?

In Phases 6 and 7 of AES10: Be an AI Mastermind Leader (Modules 0037–0052), you get the complete facilitation system and evergreen authority engine to attract serious operators and keep them for years:

- **15-Minute Timed Hot-Seat Rounds (Module 0037):** The 4-part Google Meet sequence (3 minutes for the constraint, 3 minutes for clarifying questions, 6 minutes for peer solutions, 2 minutes to commit) that guarantees equal airtime and concrete weekly breakthroughs.
- **The 90-Day Retention & Curriculum Prune (Module 0044):** How to audit attendance in Google Sheets with Gemini, reach out to drifting members before they cancel, and prune outdated AI tutorials from Google Classroom every quarter.
- **Proof-of-Expertise YouTube & Evergreen Blogger Breakdowns (Modules 0045–0047):** How to record calm, over-the-shoulder Google Vids walkthroughs and publish clean, search-indexed Blogger guides that build YouTube Partner revenue and filter in executive applicants via Google Forms audits.
- **Local Meetup.com Events & Practitioner Virtual Summits (Modules 0048–0052):** How to host a 60-minute monthly in-person AI Meetup in your city, interview quiet hands-on operators, run zero-friction multi-speaker summits in Google Meet, and bridge attendees straight into your paid advisory tiers.

Remember: you also receive **full Private Label Rights (PLR)** to all 53 hand-drawn animated lessons, so you can deploy this entire curriculum inside your own business immediately.

Check out the sample video and full module breakdown here:

To your success,
Person

Last Chance Swipe: Final Hours Before Launch Closes

Hi Person,

Quick heads-up: tonight at Midnight PST, the special launch offer for AES10: Be an AI Mastermind Leader (Animation Education Volume Ten) closes down.

If you want a complete, done-for-you 53-video animated curriculum—with **full Private Label Rights (PLR)**—teaching how to build, facilitate, and monetize a high-trust AI advisory mastermind inside Google Workspace and Gemini Notebook, this is your final window to lock it in at the launch discount.

Here is everything you are getting before the timer hits zero:

- **All 53 Hand-Drawn Animated Videos (0000 Intro + Modules 0001–0052):** Covering the 7-phase AI Mastermind Leader Operating System from Servant Leadership and Google Sites Hub Architecture to Gemini Notebook Living Wikis, Gemini Canvas Live Co-Building, Gemini Spark Agents, Timed Hot Seats, and the YouTube/Blogger/Meetup Authority Engine.
- **100% Single-Ecosystem Execution:** Every workflow runs natively inside Google Workspace (Sites, Classroom, Meet, Vids, Groups, Chat, Forms, Sheets, Drive, Calendar) paired with Gemini and Gemini Notebook—no expensive third-party community subscriptions required.
- **Full Private Label Rights (PLR):** Rebrand the videos, put your name on the curriculum, use the lessons to anchor your own paid mastermind, bundle them as a high-ticket bonus, or sell the course for 100% profit.

Do not let the launch window close without securing your license. Grab **AES10: Be an AI Mastermind Leader** right now before Midnight PST:
