

The Orchestrator's Manifesto

Why I'm 5x More Efficient and Effective Working with AI

I don't use just one AI because I am the orchestrator of my own projects, not a passive user. By running OpenAI Codex, Claude, and Gemini in parallel across multiple tabs, I bypass token limits and remove bottlenecks, keeping my creative momentum uninterrupted. I use Claude and Codex for deep, iterative execution, and keep Gemini for rapid-fire questions to maximize my budget. This orchestrated approach turns me into a high-output architect, allowing me to be at least five times more efficient than a linear, single-tool workflow.
