

## Use Multiple Types of Summative Assessments:

### Develop scoring guides or rubrics to assess the performance task

- [Quality Evidence Rubrics Designing Rubrics](#) Video (4:45) from Teaching Channel about assessing the quality of math work using a Quality Evidence Rubric and supporting materials are included on the web page.
- [Self-Assessment and Peer Support](#) Video (3:32) from Teaching Channel demonstrating students assessing their own work then pairing up for peer teaching.
- [RubiStar](#) A free tool to help teachers create quality rubrics.
- [Recipes4Success](#) Use this Rubric Maker to make customized assessments for student work.

### Performance Task Assessments

- [Mathematics Assessment Project Performance Tasks](#) Dozens of tasks for middle and high school at a variety of skill levels.. Each includes a scoring rubric, a set of pre-scored sample student work, and the same set of work without the scores.
- [Performance Assessment Research Bank](#) The Performance Assessment Resource Bank includes high-quality tasks that engage students in multiple-step and extended performances that require the planning, problem-solving, and persistence that are necessary for success in the real world.

### Portfolio Assessment

- [Student-Centered Assessment Guide: Process Portfolios](#) Article that summarizes peer assessment as a student-centered assessment practice. The guide provides a clear definition and steps for implementing process portfolios effectively in the classroom. It provides links to online examples of portions of students' portfolios including a personal statement, a student reflection of development in written communication, and a full biology process portfolio.
