About Pixelnest Studio

Pixelnest Studio is a 2-people french videogame studio created in 2014. It has released the critically acclaimed and commercially successful roguelite/shoot'em up game Steredenn and its expanded version Steredenn: Binary Stars and PC, consoles and mobiles.

The studio has also released Flipon (PC, mobiles, Nintendo Switch) and worked on other titles (Night call, Flat Eye).

With a strong 10+ years of experience and after a hiatus, it is now coming back to develop new arcade games and help studios with console ports.

About Headbang Club

Headbang Club is a furious gamedev studio. They create stuff and things and love to lose people's expectations in powerful experiences. We don't like to create boilerplate but kinda love to make games so here is that. We create our own games and work with friends on co-productions.

"I think you are consistently making cool stuff. :-)" . Anonymous publisher that refused our games (again). Welcome to the pit, let's rock this world together 🤘.
