

Operation Niggerstorm

Solving the Digitality Problem

Document courtesy of [GNAA](#).

Legal: All material on this document is declared legal property with ownership by Gay Nigger Association of America ("GNAA")

Operation Niggerstorm Logo: An image of a solarized proton admin logo. an eye is surrounded and contained by Bismuth-83 which shields against proton radiation. KFC and Watermelon, a famous gay nigger meal is hidden behind it.

PREFACE

1. All information here on this document was gathered via OSINT (Open Source Intelligence), gay porn, and sheer gay nigga intellect. The fact that anyone is here to blame a gay nigger for utilizing his exponentially superior intellect is an extremely bigoted and harassive statement. If you believe this document is created with the intention of malice you must be thinking wrong in your head as that is extremely racist and homophobic statement to say to a bunch of gay niggers exercising their proper rights.
2. To anyone attempting to fight on behalf of Mr Digitality (addressed as "Disability" here on out on this document), it would be a wise decision to have magnanimity and learn to let go of your ROBLOXian autism.
3. We did not send any death threats or SWAT people. GNAA is a civil rights thought leader, not a malicious group of trolls. Our GNAA agents had to make the right choice between outright hostility and gay nigger liberation, and we chose the latter for Mr Disability.

TLDR: the GNAA president plots a psyop to frame digitality and trick people into joining his server and to shit on him by carrying on his raiding and coerce him to explain that he has been raiding dhrp and admit to stuff, midway through a few gnaa agents manage to break into his shit, the gnaa hops on and rapes it to oblivion

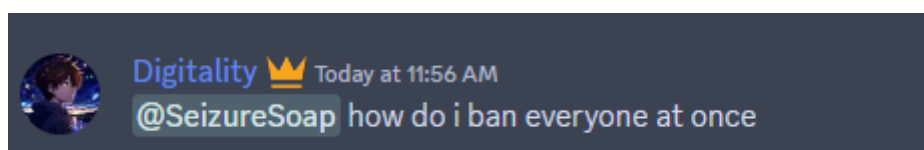

Psyop Part One

In the beginning hours of the war on Mr. Disability, our gay nigger agents had devised the ploy to masquerade under the name of Mr Disability via turnkey deployment of our automation assets in order to deter him from launching more malicious and, to be frankly honest, perverse strategy to get people to purchase his 'Proton Admin'. If you do not know, Mr. Disability operates under his namesake a 'Proton Admin', a ROBLOXian script that allows users to manipulate ROBLOXian assets. Mr Disability's bots server-hopped and joined multiple servers to advertise his admin. In order to counter this, GNAA bots sent large amounts of masquerading messages in order to trick a large horde of egotistical, self-congratulating, decadent 'known' people from the game 'Dollhouse Roleplay' to rush to his Discord and use them as an asset in our gay nigger op against Mr. Disability. This has worked extremely well ; a record amount of 90 butthurts were recorded in the Richter Scale on his server. Below is a video link that demonstrates GNAA's first psyop in the view of gay nigger spokesperson and GNAA agent, Jacob O'Kneegro:

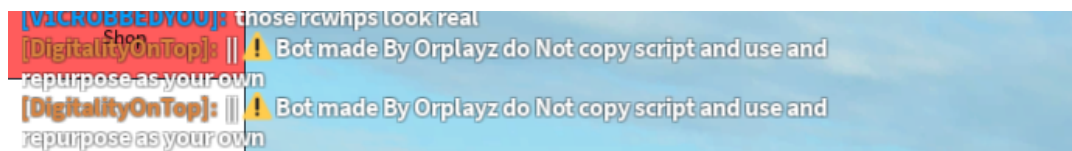

As you can tell from the extremely emotional look from Mr Kneegro, this psyop alone has costed multiple shots of 100% pure gay nigger seed from our agents and operatives. However, it is considered a decisive victory on Phase One of this niggerop.

As shown again, Disability's complete lack of regard for human and gay nigger lives, as he attempts to navigate around this shithole situation he is in by simply 'banning everyone'. This demonstrates his clear-as-day hatred for homosexual people of color simply because they are deemed too tech savvy, and frankly, this message is extremely recoiling to many gay niggers. In the words of gay nigger Jerome and Jonquavious Jenkins, "digitality, you can take your oppressive and outdated beliefs and shove 'em right up your ass. gay niggers are here to stay, baby!". In the middle of saying this, Mr Jonquavious Jenkins starts kissing Jerome passionately and they roll under the bed covers for another 30 minute gay nigger bukkake session. After no attempts were made on his part to negotiate a truce, GNAA's board of gay nigger executives on board the Ringmusculatarus II ("Ring II, from Gay Niggers from Outer Space, circa 1992") have unilaterally decided to launch a **hostile corporate takeover** of Mr Disability's assets and other information, thus begins Phase Two of this operation.

Mr Disability's goons argue that this is not a "hostile corporate takeover", but simply an internet manhunt. **This is false.** An internet manhunt, as defined by multiple wikis, is a direct violation of the Universal Declaration of Human Rights. However, as a disabled individual classified by most internet sources as "People with Disabilities", we cannot overwrite this as a wildcard term for 'human', nor can it be substituted for 'people with disabilities'. In addition to this, GNAA seeks to liberate Mr. Disability via turnkey corporate gay nigger pseudotechnology and advanced deployment of homosexual black pornography. This is not the same as an internet manhunt.

Above shows DigitalityOnTop, a GNAA clandestine automation asset masquerading as a big fan of Orplayz in order to liberate Digitality's name.

I would also like to add Mr. Disability has already been flinging people on 'Dollhouse Roleplay'. What I have planned was simply a continuation of his flingbotting and therefore is subject under his personal usage of his bots. I am simply riding his wave on his trolling attempts. He cannot blame us. In addition, we even helped him advertise his Proton Admin, albeit with a shittier fling. Below is a script used by GNAA operatives to launch the psyop: <https://controlc.com/0d16278e>

```

```

Above shows a gay nigga's extensive knowledge of psyops doing his work whilst masturbating. Cum not shown.

A second script: <https://controlc.com/3b234ba4> is also used in the psyop as well to deter Disability. At this point, Disability has woken up from his hibernatory state in Riverview, Florida and has begun to work on his two favourite admin scripts, writing Proton Admin, and copying from every other one.

In the GNAA headquarters, a massive breakthrough has been achieved in the process of liberating him. GNAA agents have discovered his extremely terrible OPSEC ("Operations Security") and our corporate agents have begun our new corporate acquisition of Proton Admin.

== PART ONE, SCROLL ==

GNAA - Digitality Problem Division

The weak OPSEC issue has been discovered by a multitude of gay nigger agents. Immediately we have established a temporary Digitality Problem Division (we will address this as DPD without the dwarf people from now on) in order to help Mr Disability thrust out his gaping, massive holes in his OPSEC.

In the first 30 minute to one hour mark, GNAA agents identified Mr Disability as a Mr. Jace, and his father as Mr. Adam. Adam operates a web development company called [REDACTED], with a twitter established in 2012 called '[REDACTED]'. Analysis of this on any database search engine reveals that Mr. Jace's email is [REDACTED], with his information leaked in Sirhurt:

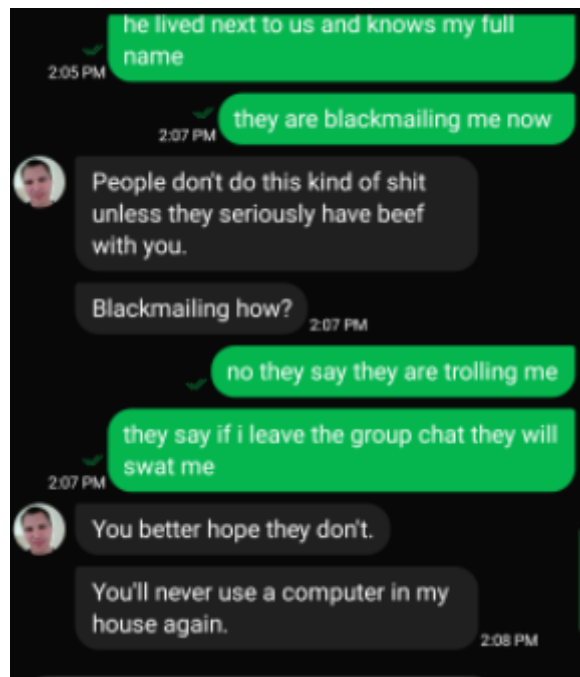

```
[
  {
    "database": "TWITTER_COM_227M_SOCIAL_012023",
    "username": "[REDACTED]",
    "email": "[REDACTED]",
    "name": "Digitalities",
    "created": "Fri Dec 04 16:20:47 +0000 2020 ",
    "followers": "2"
  },
  {
    "database": "GEMINI_COM_5536K_CRYPT0_2022",
    "email": "[REDACTED]",
    "uid": "471249247",
    "phone": "[REDACTED]"
  },
  {
    "database": "SIRHURT_NET_101K_GAMING_042021",
    "username": "[REDACTED]",
    "email": "[REDACTED]",
    "lastip": "[REDACTED]",
    "hash": "[REDACTED]",
    "date": "2020-03-19"
  }
]
```

Revealing his IP as [REDACTED] using Frontier Communications. We further examined this data, and cracked the terribly insecure MD5 hash present on the Sirhurt record, revealing his password as [REDACTED].

At this point many gay nigger agents were skeptical to attempt logging in, until a brave, courageous, and fully erect gay nigga that we won't name managed to login to his ROBLOXian Dollhouse Roleplay flingbots. We have since adjusted the strategy on those bots and amped the fling up to exploit this opportunity to give Mr. Disability even more members by flinging people. After further OSINT we have identified his biological father's email as [REDACTED].

A third party group unrelated to GNA has also begun sending death threats and swatting threats, which we do not support. GNA is a civil rights group and does not resort to petty threats in order to gain an upper hand.

As you can see however this face can perfectly link back to Mr. Adam's LinkedIn: [REDACTED]

His corporate data: [REDACTED]

And his facebook: [REDACTED]

His facebook reveals this:

After more time on OSINT than masturbating to thuggy gay porn, we concluded with this:

Adam [REDACTED]

BIRTHDATE 5/13/1985 (38yrs)

LOCATION [REDACTED]

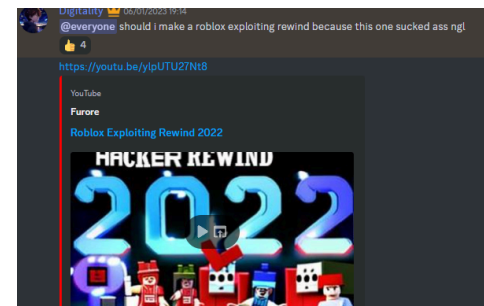

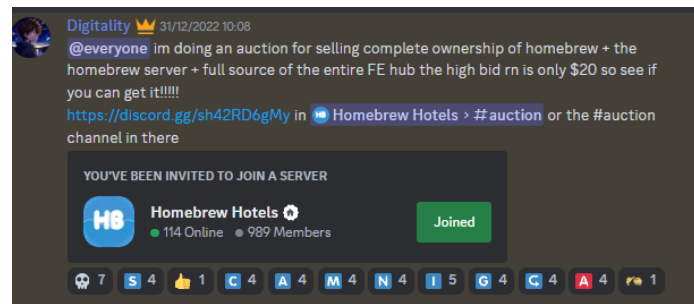

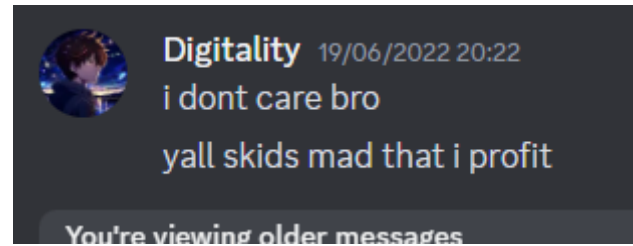

EMAIL TRUNCATED BY GNA

PHONE NUMBER TRUNCATED BY GNA

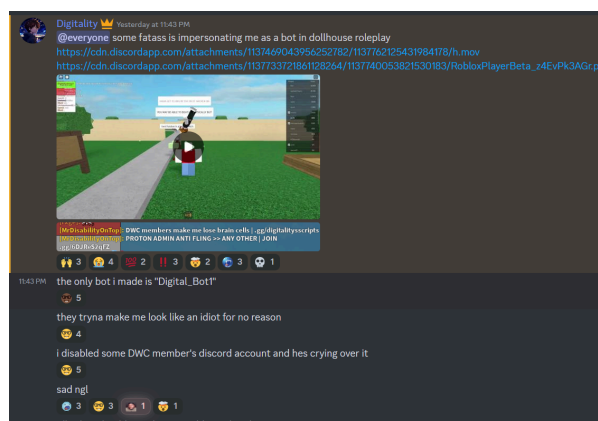

Due to ethical implications we have truncated most contactable information, including information about his mother and much more. Also, some funny images on the right:

As you can see, Mr Digitality is unable to comprehend that the vast majority of people are unable to care, assist or provide any singular cares from the bottom of their hearts to support his creative endeavors, whether it'd be copying and pasting or not. Mr. Digitality has also displayed a lack of concern for his fellow friends and routinely likes to talk trash behind other people's backs in order to gain an upper hand. With this aggregating factor in play we have decided to take action on his Luraph accounts, DHRP bot accounts, and a few others. For the sake of brevity and ethicality we have truncated most personal info from this document and to prevent this from being a 2 page document of his information.

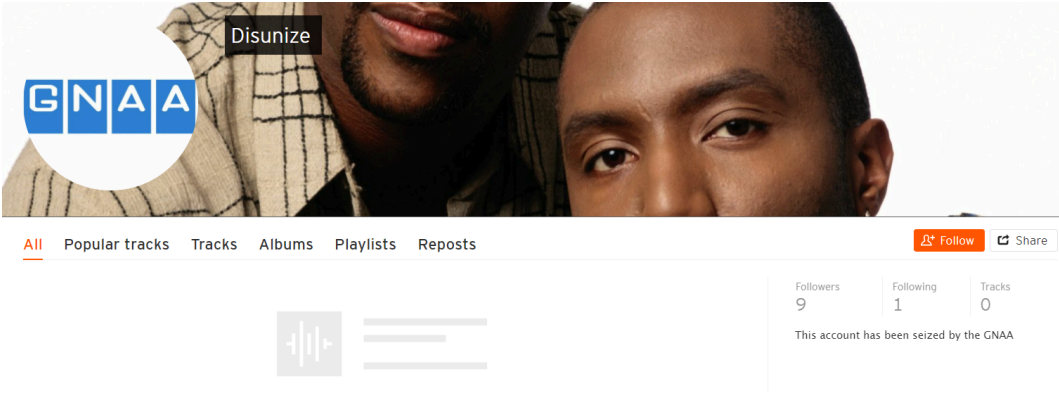

Meanwhile in the Discord server, Digitality's attempts to curb the will of the gay nigger via racism and volatile homophobia has failed miserably, and has also accidentally revealed him to be a closeted gay nigga. We would like to compliment Digitality seeing the fat voluptuous buttcheeks and naming them whilst talking about the psyop.

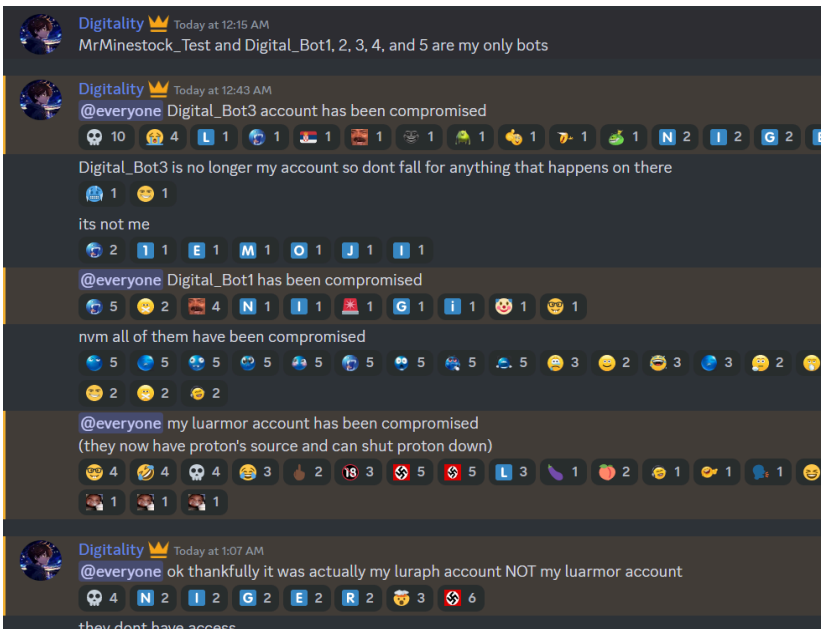

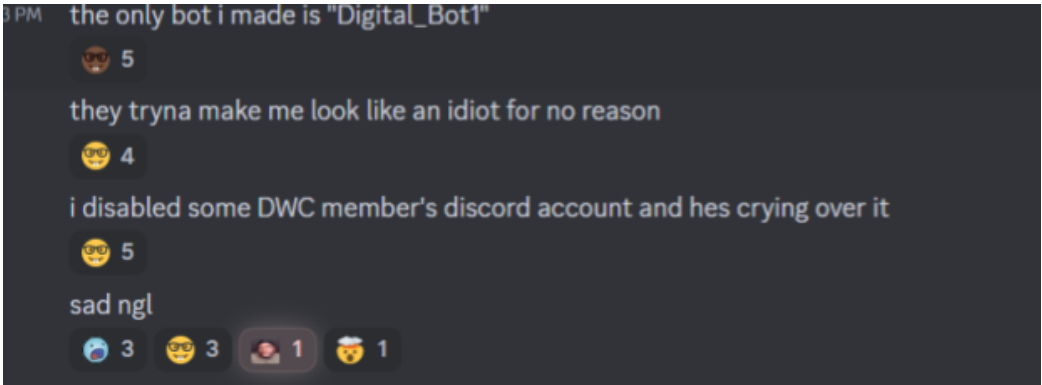

An hour later, GNAA ubernigger operatives seized Mr. Digitality's soundcloud **under suspicion of conspiracy to defraud and harm public gaynigger security**, and we have sanitized the page to be more readable for our fellow africans across spacetime:

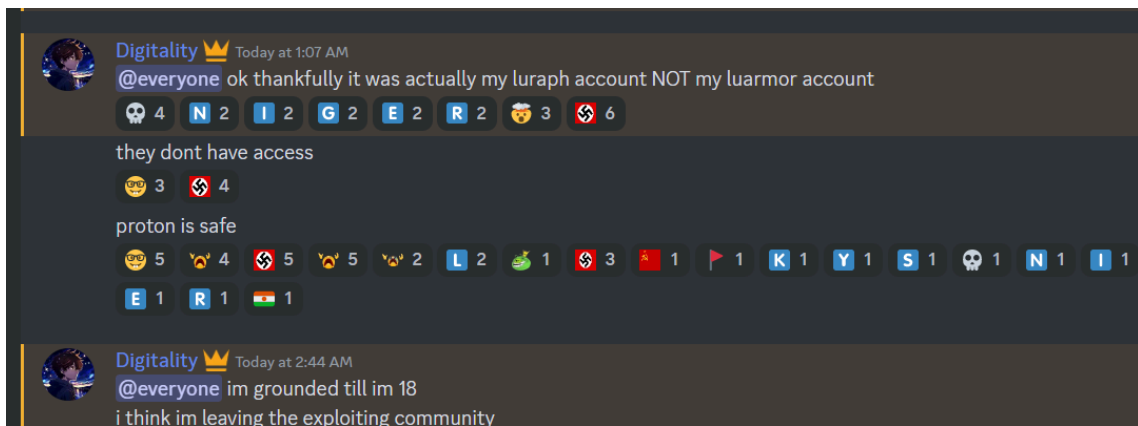

We have also seized his Reddit account to distribute and broadcast pro-gaynigger messages to help sanitize his already lowly name and turn him into a martyr and pro-gaynigger civil rights activist and hacktivist. Our agents have also assisted in hopefully helping Disability rehabilitate by distributing large amounts of homosexual black pornography.

Now, Digitality has begun his daily routine of shamelessly posting and whining about gay nigger operatives fighting for civil liberty, whilst having no idea what he just said may just so happen to implicate him in even more tomfoolery:

And then finally,

With this message, the primary objective of the GNAA psyop has been achieved and all operatives/agents have dismissed the operation and went back to their lovely gay nigga hotbox rooms, smoking joints and sucking joints.

GNAA actions and ethicality

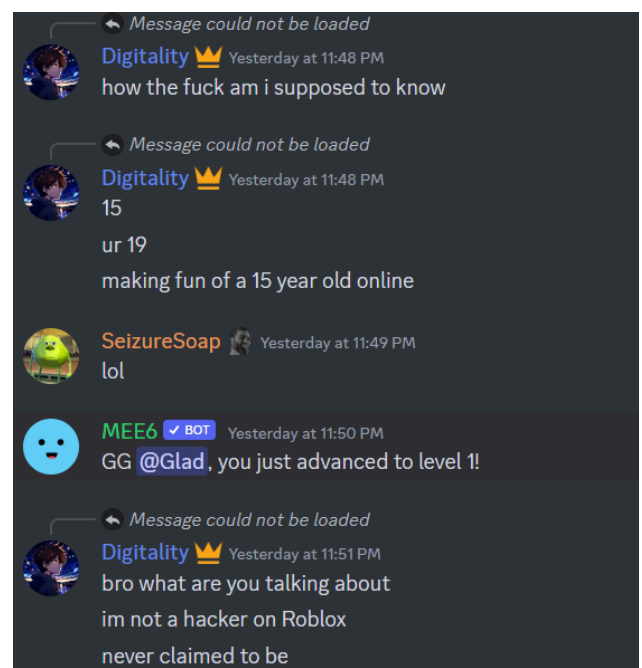

After a long, 15 minute review by GNAA's Internal Affairs Committee, the IAC concluded that the gay nigger agents involved in this operation were following standard gay nigga ethics protocols whilst engaged in interwebs combat against Mr. Digitality. This invalidates Mr. Hattab's arguments claiming it is a cybercrime. In the words of Jerome:

"the gnaa's liberation of digitality is not cybercrime because it is intended to promote equality and acceptance of all genders, sexual orientations, and races. it is a means of celebrating diversity and welcoming people of all backgrounds. ima finna turn dis shit up wit sum gay niggas and gettin real niggafied. all da haters can go suck on da girthy dicks of dem gay black niggas and dippin it low in da dark back alleys of da hood. gettin dat thug love and showin dat gansta pride. we keepin it real on da streets and showin dat niggas can be proud and gay at da same time." - Jerome, Gay Nigger Association of America

Hattab said, "To think of cybersecurity as a game is a grave miscalculation on their part". This is entirely false. GNAA is committed to upholding common industry infosec and vendor security practices and the GNAA-IAC believes that Digitality's unfortunate fate with third-party individuals, along with evidence of him skidding code, is a larger issue that endangers the very existence of Proton Admin more than the GNAA itself. Furthermore, we would like to add that we are an international coalition of gay niggers that have moles across spacetime, from the FBI to the CIA. It is impossible to crush the GNAA due to our flexible political and monopolous hold on the global geopolitical structure. Now besides from the sesquipedalian terms we are using I hope Mr. Hattab can see through our stance on this issue and understand where we are coming from.

Secondly, the very fact that Mr Disability had to run DHRP bots just to advertise his supposed admin is truly a baffling omission that his admin is already failing in the first place.

Shown on the right is Mr. Digitality defending himself valiantly during the initial phases of the psyop. Note the amount of people cheering him on.

Note the reactions. Not so nice aren't they

 **Hattab**  Today at 3:09 AM
@everyone

ATTENTION

We wish to bring to your attention that the server is now secure. All Proton members are hereby directed to return to their standard state immediately and to remain vigilant, awaiting further instructions. Under no circumstances should the server be taken online. Any occurrences of raids or potential leaks are to be promptly reported to the moderators of the "Digitality's Script" or "Proton" Discord servers.

Be forewarned: any attempts to instigate raids or disseminate false information and leaks will be met with an immediate and permanent ban from both Discord servers, a decision that will be final and non-negotiable.

On another note, it's come to our attention that Digitality is currently facing personal challenges. We want to emphasize that this doesn't signify the end of Proton. Rest assured, Proton will still be available for purchase in the near future. Our team is diligently working on finding a solution to the current challenges, and we aim to resolve them as soon as possible.

We deeply appreciate your understanding and patience during this time. The loyalty and unity of the Proton community are paramount to us, and together, we will navigate through this. Thank you.

Note the reactions. Also, "All Protons members are hereby directed to return to their standard state immediately"

We have successfully identified the individual responsible for these unauthorized actions. In our commitment to ensuring the safety and security of our community, we are presently drafting a detailed report which will be submitted to federal authorities for further investigation.

Once again, even more surreptitious homophobia, IDENTIFYING an individual on the individual's behalf when it should **clearly** **be** the individual, a gay nigga identifying as a gay nigga himself.

Finally, we would like to add that we were not responsible for the death threats or swatting threats, as that is not planned in the operation. A third party actor was involved in that. We will not be disclosing their names, but you can ask for their names by shooting an email (or a load) to floyd@gnaa.gay.

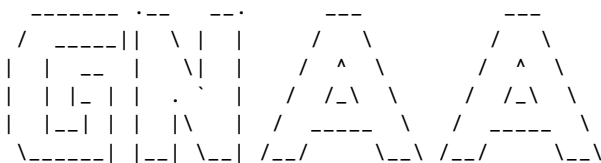

By linking this document on any platform you accept the fact that you are accessing gay nigger material and therefore you are a patron for troubled and oppressed gay niggers around the world.

Get fucking conned Disability - George Nigur, GNAA President
