Segment 1: (Sam) 2023 Unemployment Crisis IS Part of the Great Reset

Hook	So we all know the infamous phrase of the Great Reset, “you will own nothing and you will be happy” - well with the recent waves of massive job layoffs, we might be starting to see the cracks that could lead to the ultimate push to the 2030 version of the Great Reset. We may just see an unemployment crisis that could spiral us down to 2008 level recession or possibly even worse that could lead our corporate and government overlords stepping in with the ultimate solution.	https://www.cbsnews.com/news/unemployment-could-surge-to-5-1-percent-2023-cbo/ https://apnews.com/article/inflation-economy-business-727cf4baffceeadc82c3c3297deb6ddc
Setup	So just in the last 3 months, companies like Yahoo, Zoom, GitHub, Google, Microsoft, Meta, Salesforce, Amazon, and Twitter - all had a varying percentage of layoffs. Just a tech lay offs? We’re seeing the direct ripple effect hit manufacturing, banks... (think of all the restaurants, gas station, etc. that support these companies even in the local area). Less people spending money = less revenue for the other supporting businesses.	https://www.forbes.com/sites/nazbeheshti/2023/02/16/are-big-layoffs-in-big-tech-a-bad-sign-for-well-being-in-the-workplace/?sh=37da037b180b
Climax	So what seems like a wave of layoffs from tech companies, this can trigger a ripple effect into other key industries.	

	But what will keep the unemployment rate high this time: 1. Advancement of AI / ChatGPT 2. Money isn't cheap anymore. Rates are higher and therefore less capital for companies to hire back on a higher salary. 3. The Great Resignation 2 years ago caused salaries/wages to go up artificially. Some predict that we'll go to an 8 or 9% unemployment rate by the end of 2023 - also based on historical trends with inflation and unemployment. Unfortunately, the government (in terms of monetary policy) is running out of options. What are they going to do, print more money when the Fed wants to do the opposite? “If tax receipts from this year's filing season fall short of estimated amounts, the U.S. could hit its statutory <u>debt ceiling</u> earlier than July, according to the nonpartisan organization, which provides independent analyses of budget and economic issues to Congress.”	https://www.cbsnews.com/news/unemployment-could-surge-to-5-1-percent-2023-cbo/
Resolution	So with the unemployment rate potentially skyrocketing in the year 2023, what's the 2nd or 3rd order of consequences? Remember, we have a record-high national credit card debt. We're seeing LESS cash usage and MORE credit usage. What does that tell you? We're going to see people forced to sell things. (home, furniture, etc.) Companies like BlackRock have been preparing to buy real estate (\$50b)	https://moneywise.com/investing/real-estate/fund-giant-blackstone-keeps-raising-

		money-to-buy-real-estate

Segment 2: (Daniel) Train Derailment / Food Supply /

Hook	As many of you know, there was a massive train derailment in East Palestine Ohio. Residents had to be evacuated. 38 cars were derailed that contained The Norfolk Southern train that derailed in East Palestine was carrying flammable liquids, vinyl chloride, benzene and butyl acrylates, according to the U.S. Environmental Protection Agency. Ohio gov and other govt officials have stated that contamination levels are low and the water is okay to drink. Thousands of fish have died. "For right now, I think bottled water's the right answer," Ohio Health Director Bruce Vanderhoff Whats interesting is that certain employees of norfolk southern transportation company have	https://www.newscientist.com/article/2359528-ohio-train-derailment-what-we-know-about-the-toxic-chemical-spill/ https://apnews.com/article/politics-us-environmental-protection-agency-ohio-pennsylvania-business-a686a906bc165d890097646b77412b1d https://www.cbsnews.com/news/ohio-train-derailment-east-palentine-norfolk-southern-excess-size/ https://www.washingtonpost.com/nation/2023/02/15/nitric-acid-spill-tucson-arizona/
------	--	---

	said that that train had issues two days before it left illinois. Some have said this incident was caused by antifia or climate change advocates. Based on what I've research they might be reaching a bit. What are your thoughts? The Ohio River is a source of drinking water for more than five million people. There are 20 locks and dams on the Ohio River for flood control and navigation. There are 38 power generating facilities on the Ohio River. Intersects with mississippi river in cairo illinois. (Mississippi provides drinking water for over 18m people) The contamination is heading its way towards mississippi, granted very slowly, but i don't like how govt officials are down playing the situation. Reminds me of when we were told "2 weeks to flatten the curve"

Segment 3: Project Bluebeam \ UFO Sightings (Nick)

Hook	Are you ready to have your mind blown? Project Blue Beam is a top-secret government project that's been kept under wraps for decades. Its purpose? To stage a fake alien invasion and use it as a cover to bring about a new world order. Think Independence Day meets The Matrix. It's all been meticulously planned by NASA and the United Nations, and you won't believe the details. Get ready to have your world turned upside down.	https://www.youtube.com/watch?v=oRpn7hfNT08
------	--	---

Setup	Now what are the global elite always looking to do? Depopulate the Earth and bring in a One World Government.....and what a perfect way to do so with an "Alien Invasion"....And with all the recent UAP/UFO activity going on in the news right now.....one must think, are they setting us up for it? Recently China has said they've seen a UAP/UFO....Russia has dealt with this in the past....Rosewell and other events have taken place in the US..... Well according to a former CIA agent and "Men In Black" agent by the name of Joseph Spencer. I stumbled across a video of an interview from his apparent friend who was reading a letter he had written.....it was wild.....starting from how the Black Government Agency re-wired his brain with several drugs and hypnosis (MK Ultra).....to how the United Nations Agenda 21 needs to get the population down to 800 million....not only that, in the letter he mentioned how there will be a pandemic in 2018. He also mentioned how Aliens are already living among us.....I.E..Just like the Movie..."Men in Black"!	
Climax	But according to Joseph Spencer, Project Bluebeam is going to fake an invasion of aliens using holographic images. And these holographic images are going to cover the "military" aircraft that will cause chaos and destruction. Remember Spider-Man Far From Home? Where Mysterio used those drones that were equipped with projecting power and weapons to.....anyway you get the point. There's several companies out there right now with this technology, one is Light Field Lab out of Silicone Valley and their motto/saying is "Imagine one day being able to replace physical objects with nothing but light - a world where digital objects escape the screen and integrate seamlessly with reality." I'm not saying they are part of this but according to Joseph Spencer, this tech has been out for decades....	https://www.lightfieldlab.com/ Die Glocke https://www.youtube.com/watch?v=nXsth_xb5KE Dr. Carol Rosin https://twitter.com/sassysunnysoul8/status/1624832838054064128

	So what does this have to do with right now? Well Chinese Weather Balloons and several other “objects” being shot down by military aircraft in the past week or so. There have been UAP/UFO sightings in the past but I feel like we are being set-up with these recents events. And military brass is NOT ruling out Aliens although they say it’s NOT. So where does that put us? According to the letter from Joseph Spencer, 2024 is when this is supposed to happen and 2023 has been off to a WILD start....I mean there have been several people in the past that have had Alien interactions especially Military Pilots in the US and Russia....But check out Bob Lazar and Jeremy Corbell on Rogan’s podcast.....OH and Nazi Foo Fighters and DIE GLOCKE.....that’s especially wild if you want to check it out Last and final thing.....Dr Carol Rosin,Founder of the Institute for Security and Cooperation in Outer Space, was an assistant to Weherner Von Braun (Operation Paperclip) a Nazi scientist who invented the V2 and later got the US to the Moon....told Carol Rosin that, “We are going to need to create space based weapons against Aliens.....and it’s all a lie” Now is this just a distraction from Nordstream, Biden’s mess & inflation, and a possible WW3?
