The Somerset Academy Brooks ECHS Cohort Program

Objective: The SA Brooks ECHS cohort program is a supportive program in which students are scheduled together to support student success. Through this program, our school is providing our students with a supportive academic environment to earn college credit and simultaneously succeed in high school academics.

Curriculum: Students utilize SCOIR to explore college and career opportunities and assess their knowledge of various career pathways. Assessment features through SCOIR allow students to better understand how their unique interests and talents correlate to career pathways.

Other Supports: Students have access to a proctor that monitors their dual credit progress and conferences with individual students regarding their progress in each course they are enrolled in.
