Guide to using the models… **PLEASE READ**
https://docs.google.com/document/d/1R8bLTr3moDJrXHa-wE-3viOpAisTX-nAz1h8LhIcSms/edit?usp=sharing

*If you open this document in **Safari** browser on your phone the models may be blurry. Idk why, it's a Safari thing. If you open it with google or chrome on your phone it should be fine. If you are on mobile I recommend you download the **Google Docs app** and when you click the link from my website it will just auto open it in the Google Docs app and the images will appear fine.

MEMO

-11:48
Going with just the Blue model from this point forward. For those of you that are curious, the only difference between the 2 models today is Texas +126. Pretty close on both models. Anything below +120 on Texas it wouldn't be a play so keep that in mind. Otherwise, it's a good day to move forward as they basically agree on everything else. Obviously Tuesday and yesterday were less than ideal results. Errors and unearned runs are going to be the killer when using the model. Errors burned me with Tampa, and almost cost us Detroit, yesterday. Errors are so difficult to handicap for since they are so random. Very similar to fumbles in football. Hard to handicap for you just gotta hope they don't happen.

My goal with cutting it to just the Blue model was not only to play just the sharper edges but to also cut down the volume of plays. But of course the first day I do it spits out 6 plays lol. Makes sense though when you think about it. Favorites have been hot so naturally the books know this and they shade the lines to the favorites. So yes there are more plays than I expected today but it seems about right considering how favorites have performed in the market over the last 3-4 days.

I'll look at the K Model as umps are announced. Last 2 K props with Lodolo and Abbott were rough beats man. Lodolo looked great and got pulled with a low pitch count. And Abbott looked like an easy win with 5 Ks through his first 45 pitches then struck out just 1 the next 60 pitches. So those stunk. Obviously going to happen, I thought they were great plays and just didn't get the ideal result. So I won't force any K action today unless there is something I see that I really love.

NBA playoffs start today. Nice to start it off with a win last night cashing Coby White u20.5 pts. Tonight I will be backing the Lakers +7.5. I really like the Lakers in this series. Think they've been playing great ball and I think this is the best team the Lakers have had since Lebron got there. I would not be shocked to see the Lakers take this series. Yes their win/loss vs Denver over the past 365 days is less than stellar but in every game the Lakers played them very close then its the same song and dance… last 4 min Denver goes on a run and wins the game. Hoping for a different result this year and I think the Lakers have the pieces around AD and Lebron to do it.

Strikeout (K) Model:

Seattle	Colorado	Luis Castillo	Dakota Hudson	Brian Knight		7.4	-
Toronto	San Diego	Jose Berrios	R. Vasquez	Ramon De Je…		5.5	#N/A

No Plays

Honorable Mentions:
Keller 7+ (+110)
Ragans 7+ (+110)
Morton 7+ (+162)

So plays under the model are my official plays. I will post honorable mentions as well. Honorable mentions will not be graded and I personally won't be on them but I'll add them here. Variety of reasons I may not play them are: Pitcher proj looks good but i don't love the price, or pitcher proj is close and i like the price.

Like I said , I won't be grading the honorable mentions but I will provide them in case you want to use them in some way or even play a K Prop Parlay (which are fun). However you want to use the info is up to you.
