

Pre-event Volatility Forecast.

Understanding market volatility is key to developing a risk-managed trading strategy. Periods of high volatility can be challenging to forecast and are often triggered by macroeconomic events such as non-farm payroll or interest rate decisions.

The Autochartist pre-event volatility forecast alerts you to pending macroeconomic events that are likely to cause high volatility. It also gives a forecast range for potential movements based on instrument-specific historical data during similar events.

These alerts are useful to many trading styles. For those with a more conservative style, this information can be used for proactive risk reduction. If you prefer to trade during periods of high volatility, our pre-event forecast notifies you when the event is set to take place as a reminder to trade. Additionally, you can use the predicted price movement range to set your stop loss and take profit levels at appropriate points. Options traders are especially excited to get notified of these volatility increases because many of their trading strategies take advantage of high volatility.

If you don't have the time to constantly check for high-impact news events, or the confidence to forecast how these events will affect your instruments, the Autochartist pre-event volatility forecast is ideal for you. We will make sure you are always informed of upcoming events and equip you with detailed price range forecasts to help inform your trading decisions.

Condensed for translation

Understanding market volatility is an essential part of a risk-managed trading strategy. Periods of high volatility are challenging to forecast and are often triggered by macroeconomic events such as non-farm payroll or interest rate decisions.

The Autochartist pre-event volatility forecast alerts you to upcoming macroeconomic events that are likely to cause high volatility. It also gives a forecast range for potential movements based on instrument-specific historical data during similar events.

These alerts benefit various trading styles, aiding conservative traders in proactive risk reduction. Our pre-event forecast alerts on upcoming events allow for strategic stop loss and profit level settings based on predicted price movements for those seeking high-volatility trading. Options traders often value these alerts for strategies reliant on volatility.

The Autochartist pre-event volatility forecast is perfect for traders who lack time to track high-impact news or forecast its impact on instruments. We update you on imminent events and offer detailed price range forecasts, enhancing your trading decisions.

Russian

Ponimaniye volatil'nosti rynka yavlyayetsya vazhnoy chast'yu trgovoy strategii s upravleniyem riskami. Periody vysokoy volatil'nosti slozhno prognozirovat', i oni chasto provotsiruyutsya makroekonomicheskimi sobyitiyami, takimi kak resheniya po zarabotnoy plate v nesel'skokhozyaystvennom sektore ili resheniya po protsentnym stavkam.

Prognoz volatil'nosti pered sobyitiyem Autochartist preduprezhdayet vas o predstoyashchikh makroekonomicheskikh sobyitiyakh, kotoryye mogut vyzvat' vysokuyu volatil'nost'. On takzhe dayet prognoziruyemyy diapazon potentsial'nykh dvizheniy na osnove istoricheskikh dannyykh po konkretnomu instrumentu vo vremya analogichnykh sobytiy.

Eti opoveshcheniya polezny dlya razlichnykh stiley trgovli, pomogaya konservativnym treyderam aktivno snizhat' riski. Nashi predvaritel'nyye prognozy o predstoyashchikh sobyitiyakh pozvolyayut ustanovit' strategicheskoy stop-loss i uroven' pribyli na osnove prognoziruyemykh dvizheniy tsen dlya tekhn, kto ishchet trgovlyu s vysokoy volatil'nost'yu. Treydery optsiyonov chasto tsenyat eti preduprezhdeniya dlya strategiy, osnovannykh na volatil'nosti.

Prognoz volatil'nosti pered sobyitiyem Autochartist ideal'no podkhodit dlya treyderov, kotorym ne khvatayet vremeni dlya otslezhivaniya vazhnykh novostey ili prognozirovaniya ikh vliyaniya na instrumenty.
