About the author(s)

Prof. (Dr.)Ajit Kumar

Authors have full right to write about themselves as they wish. It should reflect at least their highest degree, designations, positions, the hold currently and /or previously. Authors also mention all of their notable achievements in brief so that the title page does not exceed the area covered by the 1st page. It should be written using 'Book Antiqua' highlighted as bold with italic and 12 fonts.

Prof. (Dr.)Pranav Vardhan

Authors have full right to write about themselves as they wish. It should reflect at least their highest degree, designations, positions, the hold currently and /or previously. Authors also mention all of their notable achievements in brief so that the title page does not exceed the area covered by the 1st page. It should be written using 'Book Antiqua' highlighted as bold with italic and 12 fonts.

Brief Note: The brief note shall be written in English and the text should be formatted using 12 point Times New Roman. Abbreviations must be defined at the first time they appear before being used in the text. Brief note is basically the summary of your title, statements, objectives, methodology, results and conclusion. In brief note, references, figures, tables, equations or bibliographic references will be strictly avoided. The brief note must be minimum of 100 words and must not exceed 150 words. The line spacing for **brief note** shall be 1.5. The full chapter in MS Word file shall be written in compliance with these instructions before it send to the editor.

Keywords: Keywords (maximum five) should be mentioned in the brief note, and separated with a comma (,) each.

1. INTRODUCTION (CAPITAL, TNR 12, BOLD)

The section headings are in boldface capital and uppercase letters. It is expected that authors will submit carefully written and proofread material. Spelling and grammatical errors, as well as language usage problems, are not acceptable. There is no strict limitation to the number of pages, but it is suggested that the paper length should **not exceed** 15 pages.

Chapter should clearly describe the background of the subject with a special emphasis on the main theme sustainability and developments. Chapter is to be prepared in English language and SI-units shall be used. Technical terms should be explained and ‘Acronyms’ should be written out at their first appearance.

Citations in the text should be denoted like [1]

Manuscripts must be typed in Time New Roman with single spaced throughout. Uses a 12-point font; employs italics, strictly avoid underlining (except with URL addresses); and all illustrations, figures, and tables are placed within the text at the appropriate points, rather than at the end. The line spacing should be 1.5

All numbers less than ten should be spelled in full .Italicize all scientific names. Use British spellings, metric measurement.

All scientific names used must be in accordance with the subsequent International Commission.

2. PAPER FORMAT

Authors can use this template file to construct their chapters. Please make the page settings of your word processor to A4 format (21 x 29.7 cm or 8 x 11 inches); with the margins: bottom 2 cm and top 2.5 cm, right and left margins must be 2 and 2 cm respectively.

All text paragraphs should be single spaced. Double spacing should only be used before and after headings and subheadings as shown in this example. Position and style of headings and subheadings should follow this example. Please DO NOT change any of the above mentioned page, paragraph and font settings.

2.1 Subsection 1

2.2 Subsection 2

To write the subsection author should use 12-point Times New Roman font. The styles available are bold, italic and underlined.

It is recommended that text in figures is not smaller than 10-point font size.

2.3 Tables and Figures

Figure captions and table headings should be sufficient to explain the figure or table without needing to refer to the text. Figures and tables not cited in the text should not be presented. Styles Heading Table and Caption Figure are available in this template for tables and figures.

The following is the example for Table 1.

Table 1. Title of Example Table.

Header	x	x	x
First row	Freshwater	NaCl	Salt
Second row	Subject	Science	Physics

Tables and figures should be placed close after their first reference in the text. All figures and tables should be numbered with Arabic numerals. Table headings should be centred above the tables. Figure captions should be centred below the figures.

Figure 1. Example of figure for the full chapter.

2.4 Subsection 3

Each equation should be presented on a separate line from the text with a blank space above and below. Equations should be clear and expressions used should be explained in the text. The equations should be numbered consecutively at the outer right margin, as shown in Eq. (1) and (2) below. Here is one example.

$$\binom{m-1}{k-1} = \frac{(m-1)!}{(k-1)!(m-k)!} \quad (1)$$

3. CONCLUSION

Conclusions should state concisely the most important propositions of the paper as well as the author's views of the practical implications of the results. The conclusion is intended to help the reader understand why your research should matter to them after they have finished reading the paper. A conclusion is not merely a summary of the main topics covered or a re-statement of your research problem but a synthesis of key points and, if applicable, where you recommend new areas for future research.

4. ACKNOWLEDGEMENT

The authors can add in the acknowledgement if they would like to express their appreciation for the support of the sponsors with certain Project No, individual or organization/institution.
