Topic of the seminar	:	<i>“Building winning attitude for an interview success”</i>
Date of Seminar	:	September 18, 2021
Time	:	12:30 p.m. -1:30 p.m.

Minutes of the meetings :

- ☑ Students have learned so many things from this session like
 - o Understand the purpose of the interviewer.
 - o To know how attitude is the most unique dimension for interview success.
 - o To embrace a more positive attitude and improve your chances of interview success.

- ☑ KSA model is been described by the Dr. Pachauri was

K= Knowledge

S=Skills

A=Attitude,

This model shows the difficulty of developing in the individuals. Most difficult is attitude as every individual possesses a different attitude and attitude is something which is worn by the individual.

To get success in an interview:

- ☒ Students must possess a positive attitude to see things. Positive attitude can also help to lead the interview and can mold the things into your way.
- ☒ Always have the attitude of “I can” and “it is possible”.
- ☒ Never play a blame game and try to cope with the low locus of control so that the blame game should not start.
- ☒ When students are not comfortable with any question then always give the answer in the way to show them your USP and your personality.
- ☒ If interviewer will ask you “are you able to handle the position” this means he is trying to check your confidence level and knowledge about the field or work.
- ☒ To build a good and positive attitude one should be aware of his/her strengths and weaknesses. Students should know how to turn the weakness into the strength according to our job profile.
- ☒ If someone asks you to scale yourself then you should justify yourself while giving the ratings.
- ☒ Always the attitude of initiative and attitude of learning stress are the main aspects of building a positive attitude.

Number of Participants : 62 participants were there from academia, industry and students from different background.
