Please follow these basic steps to link your OSPI and pdEnroller accounts. Linking the two accounts will make it easier for you as you are completing clock hours through pdEnroller. Any class which shows on your pdEnroller transcript should transfer over automatically to your OSPI account. If you need help beyond what I've provided here, you'll need to reach out to OSPI directly.

You'll need your OSPI login information handy when you complete these steps:

1. Log in to your pdEnroller account
2. Click your name at the top right-hand corner
3. On the dropdown that opens, click Profile
4. On the left-hand side of the screen, click External Logins
5. Under the header Link to another account, click EDS
6. Enter your OSPI login information and click login
7. It should then bring you back to pdEnroller once it's done processing
