

StarBorn

StarBorn Series

Inspired by Persian miniature and Constellation

By Mobina Nouri

Starborn is a constellation of living myths, where each composite animal carries the spirit of the world within it. These creatures are not singular, they embody countless beings, memories, and energies, layered like the stars themselves in the night sky. Through storytelling, each work becomes a vessel of ancient wisdom and contemporary experience, connecting myth and imagination, the personal and the universal. They invite the viewer to witness the hidden harmonies of life, the interconnections between all forms of existence, and the quiet magic that threads through nature and consciousness. In each piece, the fantastical meets the familiar, creating a universe that is at once intimate and infinite, mystical yet tangible, a testament to the enduring power of narrative, myth, and wonder.
