

191181 ANSR Source Content US LLC

Accessibility Remediation:

Professional services for accessibility remediation focus on fixing the barriers identified in an evaluation, like modifying website code to ensure keyboard navigation works or adding alternative text to images. This process often involves expert developers implementing changes to bring the digital product into compliance with standards like WCAG.

Ordering Information:

Vendor: ANSR Source Content US LLC

Contact: Katie Trotta, 5900 Balcones Dr. Ste 8078, Austin, TX 78731,

Conditions of Agreement:

- Solicitation link: [Solicitation IFB 2024000124](#)
- Contract: [ANSR Source Content US LLC Agreement](#)

Other notes:

Digital accessibility requirements for the state may be found here: C.R.S. § 24-34-802 and C.R.S. § 24-85-103. The Colorado Governor's Office of Information Technology (OIT) has adopted rules to implement the law, which can be found in **8 CCR 1501-11**. These rules establish the specific technology accessibility standards that public entities must follow. Subsequent legislation, such as **Senate Bill 23-244** and **House Bill 24-1454**, has clarified or amended aspects of the original law, including enforcement and grace periods for compliance.

Disclaimer:

OIT solicits these OIT Enterprise Agreements for IT products and services with the intention that they are cooperative purchasing agreements under Article 110, Intergovernmental Relations, of Colorado Revised Statutes (CRS 24-110-101, et seq.) making all branches of state government, institutions of higher education and local public procurement units eligible to participate in the resulting awards. **It is up to these entities to determine if they are authorized (under each entity's own procurement rules or policies) to use these OIT solicitations and resulting Enterprise Agreements to procure IT products and services**
