

2025-26 INTEGRATED PCHT COMPLETION REQUIREMENTS

<i>When</i>	PGY-1 Blocktime.
<i>Integration Due</i>	7 days after the end of FM blocktime.
<i>Meets Learning Objectives Of</i>	4-week block of PGY-1 PCHT.
<i>Successful Completion Results in Choice Of</i>	In PGY-1, residents may choose to either complete the standard PCHT rotation or receive 4 additional weeks of elective time in its place.
<i>Supplementary Information</i>	You may see patients from any population to meet the requirements of this integration. This integration is intended to be in primary care, so hospitalist practices in focused areas (e.g. surgical hospitalist) would not meet the requirements of this integration. FM blocktime and FMObs rotation requirements take priority over PCHT integration requirements. Accordingly, scheduling of FMObs call shifts takes precedence over PCHT call shifts.
<i>Longitudinal Requirements</i>	Throughout the PCHT integration, residents are expected to engage in ongoing activities that support continuity of care and the development of comprehensive clinical skills. These include, but are not limited to, participating in patient admissions, daily rounds, team consultations, discharge planning, consistent patient follow-up, participation in after-hours care, and fulfilling educational objectives across the full duration of the integration. Residents must complete a total of 4 weeks on the PCHT service over the 5-month FM blocktime period, with a schedule of 5-6 working days per week.
<i>Call Shift Requirements</i>	Residents are required to complete one 12-hour call shift (home, switch, or in-house) during each PCHT week for a total of 4 call shifts by the end of their integration. This is to ensure adequate exposure to after-hours care as part of meeting the integration objectives. You will submit your PCHT call to your site admin for payment. You cannot exceed 9 call shifts in a block for any rotations (FM blocktime & FMObs).
<i>Final Reflection Requirement</i>	Write a one-page, single-spaced, typed reflection responding to the question: “What did this PCHT Integration mean to you and your future career as a Family Physician?” This reflection is separate from the brief weekly summaries you will fill out in your tracker. It is the final step before submitting your integration and must be Emailed to fmic@ualberta.ca.
<i>Integration Communication and Progress Deadlines</i>	Respond to all integration-related Emails within 72 hours, unless you are on leave. You will receive a progress check-in Email every 6 weeks. Keep your tracker updated regularly, honestly, and with detailed information for each PCHT week completed. Maintain punctuality, professionalism, respect, preparedness, and strong communication throughout all integration activities and interactions.
<i>Integration Completion Checklist</i>	You have filled out the Google tracker to the best of your ability. You have Emailed your reflection to fmic@ualberta.ca. You have Emailed the name(s) of the preceptor(s) you wish to complete your final

	ITER (evaluation) to fmic@ualberta.ca. Once the ITERs are completed, the Integrated Curriculum Coordinator will review your integration as a whole and recommend a Pass or Fail.
