

Pure Pwnage Extras Archive

Changelog 1.1

01. Web Series (2004) > Season 1

Folder "MKV (with Commentary)" added, containing all the original videos from Season 1, but packed inside an MKV container with English subtitles and two different audio streams.

The first audio stream is the original one and the second is the commentary track with Jarett and Geoff, that is on the "PP Web Series Season 1 DVD Commentary"

All the *SUB* subtitles were refined. Some of them had "[br][br]" tags that were not properly displayed. Those are now replaced with "\n" that will show the text on a neww line.

SRT format subtitles were added for compatibility with different players.

01. Web Series (2004) > Season 2

Some of the subtitles were refined.

New (working) subtitles were added for episode "Episode 16 - Duty Calls", as the old ones were broken.

Folder "Original" added containing the So2 episodes in their original formats (as they were on the PP website)

"Episode 16 - Duty Calls" inside folder "720p" was upscaled to 720p. This is just to match the rest of the episodes here by resolution. The quality is still the same as the original version is 360p and there is no better version of it.

01. Web Series (2004)\Shorts\

Inside folder "Premiere Screening" - "Pure Pwnage Episode 9 Premiere.avi" replaced with a slightly better mp4 version.

Folder "Jeremy and Kyle - Pure Pwnage Shoutcast1" moved to "04. Extras\Videos\Shoutcast"

04. Extras\Audio

Folder "Commentary" added containing the mp3 version of "PP Web Series Season 1 DVD Commentary" and "Xfire Chat EP12 Commentary"

Folder "Podcasts" added containing:

"Anything Goes" - "Episode 074 - Jarett Cale"

"Geek Cred" - "Geoff Lapaire"

"Good Enough To Air" - "Special Episode - Pure Pwnage Teh Movie (2016)"

Inside folder "Unofficial Music" - Folder "Remixes" added containing "BOOM HEADSHOT Song by ohJAx1337.mp3"

04. Extras\Games

The flash game "Pure Pwnage - The Game in Episodes v2.0.exe" was removed. You can always find it in the original version 1.0 of this backup (on MediaFire and Icedrive)

04. Extras\Screen Savers

Folder "Screen Savers" removed with 4 screensavers inside.

I did an AV check on those and Malwarebytes gave me some red flags. Probably a False Positive, but still I've decided to remove them. You can always find them in the original version 1.0 of this backup (on MediaFire and Icedrive)

04. Extras\Videos

Inside folder "Hak5" - "Hak5 - Episode #8.5 - Pure Tech Entertainment.avi" added.

Inside "Montages" - "Big Big Big Da Balls" and "BOOM HEADSHOT" were grouped by folders.

Folder "Shoutcast" added here in order to move "Jeremy and Kyle - Pure Pwnage Shoutcast1" inside from "01. Web Series (2004)\Shorts\"
