STUDYING AT COLLEGE

This year I left school and decided to enter the Berezne Forestry College. I passed my entrance examinations successfully and now I am a full-time first-year student of the Berezne Forestry College.

Our college runs two departments: a full-time department and a correspondence department. I am in the full-time department. There are four faculties in the full-time department: a forestry faculty, a garden park facilities faculty, a hunting faculty and a book - keeping faculty. I'm in the forestry (book –keeping, garden park facilities, hunting) faculty.

Our academic year began on the first of September and it will end in July. We study many different subjects. In the first year we study, as a rule, general educational subjects. In the next years we will study specialized subjects and probably some optional subjects.

Our classes begin at 8.30. On Saturdays and Sundays we don't have classes, these are our days off. Every day we attend lessons and have practice. Usually we have eight hours (four double periods) a day with a lunch break. Our lunch break lasts 1 hour. During our lunch break we have a rest and we can also take some refreshments in our refreshment room. We also have a good canteen where we have our meals before and after classes.

We have our lessons in different subjects in the classrooms and laboratories which are large and light. We have our physical training lessons in the gym or at the college stadium if the weather is fine. We also do laboratory work in the laboratories.

On the wall of the entrance hall there is a timetable which includes the names of the subjects, the time and the numbers of the classrooms and laboratories for each day of the week.

After classes we attend tutorials, different circles, clubs and societies. On Wednesdays we have educational hours or group meetings. At our group meetings we discuss academic performance of our group and poor academic performance of some students. In the afternoon

and in the evening we prepare our homework for the next working day. We prepare our homework in the rooms of the hostels where most of the students live. Some students work in the reading room or the library.

OUR COLLEGE

The Berezne Forestry College was founded in 1967. Its aim is to train specialists for the forest economy of Ukraine and first of all for the western regions of Ukraine.

The college is situated in the picturesque outskirts of the township of Berezne (Rivne Region). It occupies several buildings. Besides two academic buildings there are also three garages for lorries, tractors and various kinds of forest machinery, two workshops (a locksmith's workshop and a joiner's shop), a canteen, two hostels for students and some other buildings.

The main academic building has four storeys. On the ground floor there are an entrance hall, a gym, an assembly hall, a counting room, a director's office, an office of the head of studies, a reception room, a refreshment room, a cashier's room and a laboratory for afforestation.

On the first floor there are a teachers' room, a library, a reading room, a radio centre, a correspondence department office, an office of the heads of departments, a common office of the managing director and of the head of the practical training of students, a physics laboratory and a classroom for book-keeping.

On the second and third floors there are classrooms and laboratories for different subjects.

The second building has two storeys. On the ground floor there is a laboratory for mechanization of forestry and a garage for different machines used in the forestry. On the first floor there are 8 classrooms and a laboratory for forest utilization.

The classrooms and laboratories are large and light. The laboratories have modern equipment.

Near the college there is also a dendropark which occupies the area of more than 25 hectares. The students often have their practical training there.

The college library contains a lot of textbooks, fiction, magazines, journals and

newspapers. It is open from 8 a.m. till 7 p.m. in term-time. The students often do their homework in the reading room.

On the wall of the entrance hall there is a time-table which includes the names of the subjects, the time and the numbers of the classrooms and laboratories for each day of the week. Not far from the time-table there is an advertisement board on which there are announcements about meetings, parties, the work of different circles, club and society sittings.

The college has two hostels. Most of the students live in the hostels which are quite near the college and it takes the students only a few minutes to get to the college on foot.

EXTRACURRICULAR ACTIVITIES

After classes we do a lot of various kinds of work. First of all we attend tutorials in different subjects. Many students of our college take part in the work of different circles such as a chorus, a dancing circle, a folklore ensemble, a vocal and instrumental ensemble, a theatrical circle, a recitation circle and some others.

We are also members of clubs and societies in different subjects such as the foreign language speaking clubs, history, mathematics, physics, literary and chemistry societies and many others. We organize thematic parties.

We also attend different sport sections and clubs and take part in sports contests in football, basketball, volleyball, track and field athletics and in other kinds of sport.

We work a lot to look after the college grounds that are divided among the academic groups. Each group is responsible for a certain plot of the college grounds where the students do the tidying up, plant flowers, trees and decorative bushes and look after them.

We also plant trees and bushes on the grounds of other enterprises and organisations of our town.

We take part in working hours doing all sorts of work at our college.

We tidy up our classrooms and laboratories, our rooms in the hostels and keep them in order. We are also on duty in the classrooms and laboratories, on the floors of the academic building and on the floors of the hostels, in the canteen and in the dendropark.
