9/09/2024

To Community, Staff and Students,

At approximately 4:30 pm this afternoon I received an email from a former student who was very concerned about a Snapchat that one of her relatives received and had forwarded on to her. The content of the Snapchat implicated *Lake City High School and/or MS as being the next spot for a school shooting*. There was no date, time or indication which Lake City (Florida, Minnesota, Iowa etc...) the sender was referring to and no local implications to this point of who sent the original message.

As we take all threats seriously, the incident was reported to three different law enforcement agencies who have not been able to verify further information but ask the general public and staff to remain calm and allow these agencies to complete their investigative work.

**UPDATE AS I WAS TYPING:** It has been confirmed the incident was in Lake City Florida.

With this news we will continue with school in all buildings as planned for Tuesday, September 10th with additional police presence available.. If further information becomes available and plans change our school populations and community will be contacted through another REMIND message similar to this caliber.

We thank our local authorities for their quick action and communication during this perceived threat.

We appreciate your patience and understanding as we navigate these situations carefully.

Respectfully,

Brad Anderson
