

"Hello Akron! It is a great night to be in such a great city. We can do so much better though. Ever since the border crisis the opioid crisis has exploded across Akron and all of America. We need a government who will fight and destroy the opioid crisis. That's why I am promising new investments into rehab programs to help fight opioid addictions. We must also destroy the supply of opioids. That's why on day 1 I will declare an emergency along our southern border. We will make it where no drugs or illegal immigrants can ever cross our great border with new border patrol agents and we will modernize our great big wall with the new technology of the era to stop drugs from coming into this country. We must also stop drugs by the sea which is why we will expand the coast guard. To those who attempt to break through the United States military will always be prepared to stop the flow of fentanyl into our country to save lives. If you try to traffick drugs by boat we will attack your boat. We will have strong borders ending the current open border policies destroying our country. We will keep America secure. As President I will also crack down on Pill mills which are allowing for opioids to flood into our streets. Folks, with these strong policies to annihilate the supply of opioids and to help folks struggling with opioid addictions, we will finally be able to start defeating this crisis. Vote Thiel/Ryan 36 to save American lives! Thank you Akron. God bless you and good night."
