

### **Fossil Exploration**

Upon preparing the ground for your roller coaster, Six Flags Amusement Parks has discovered fossils. This fossil discovery is going to postpone the building of a new roller coaster. Now Six Flags Amusement Parks has tasked you with identifying the fossils before they can proceed with construction. For each fossil you will need to: make good observations, inferences, and predictions. You may need to research to learn more about what has been found. **Answer using blue font.**

For 2 fossils, make an observation, inference, and prediction.

	Fossil Number:	Fossil Number:
Observation: What you see, description.		
Inference: Thoughts on your observation, what you think.		
Prediction: What you think it is and why.		

From the video, [What Can We Learn from a Fossil](#), what are 5 things we can learn from fossils?
