Projects

Story Squad, Frontend -

November 2020

An Interactive learning platform targeted at grade school children with a focus on helping build reading comprehension as well as artistic, writing, and analytical/critical thinking skills through weekly competitions.

Node.js | React.js | PostgreSQL | Knex | Jest | JSON Web Token | Okta-based Authentication

- Revamped styling with the mobile-first paradigm
- Built custom hooks for logic on UI components
- Created documentation to standardize the format of custom fields resulting in streamlined frontend implementation
- Executed product roadmap by coordinating open dialog between a cross-disciplinary remote team of 4, consisting of both frontend and backend developers
- Assisted team members in debugging through daily code reviews and pair-programming

Pintreach, Frontend [\[GitHub\]](#)

July 2020

Built within four days, this web app is meant to encapsulate articles in many categoriesInstructors for ease of access to topics of interest.

React | Redux | React Router | JSON Web Token | Axios | JavaScript | HTML/CSS

- Co-Engineered state management system using Redux; debugged code to function with Redux and Routing
- Utilized private routing and Axios requests to incorporate authorization-based CRUD functionality
- Executed project over 4 days on a remote cross-functional team of 4 developers, communicating exclusively over Zoom and Slack
- Assessed trajectory and prioritized team to focus on features and functionality required to hit MVP
