Crowdsource an Answer to a Subjective Question

Please pick a box to type in and answer the following question.

What are your biggest concerns with integrating technology into your classroom?

How to integrate technology into all four language acquisition skills- speaking, listening, reading and writing.
Students are at all different levels in their knowledge and use of technology
Having the time to create the assignments and implement over different subject matter.
Not having the computers available to use with my students.
Availability of computers, frequent breakdowns of hardware & software.
Too many tech tools, not sure which is best for the students. If we are having students save to google cloud, what happens when Internet goes down...is there an offline access?
How to safely bring electronics to PE class. LARGE class size & WIFI access.
Not enough computers available for students
Keeping up with the kids' understanding of technology.
access to laptops

Not having access to computers because there is 1 COW for 4 classrooms in our grade level pod and we all teach each subject at the same time.

Will the technology cooperate with the lesson

Will I remember how to use all I learned and if students need help will I have the knowledge to help them.

Wireless not working for all students

We don't always have easy access to computers. Availability/ sign in issues

Making sure kids are careful when accessing the internet. They shouldn't trust everything they read! Anyone can post anything to the internet!
