

A List of Non-Traditional Pronouns

Compiled by Nico K., nonbinary linguist & activist

Notes

I've tried to include as many nonconventional pronouns I can find. All are intended to be third person, gender neutral pronouns, or at least less gendered than traditional pronouns. You are welcome to comment or [contact me](#) to request **adding** or **removing** a pronoun set.

To make this list more accessible, **I do not add** pronouns to this list that contain swear words, slurs, or not-child-friendly language. All others you are free to request, including pronouns loaned into English from other languages.
